

Acknowledgements & Foreword

This “Electronic Booklet” is the result of suggestions from various people. JoAn Wilcox, is an American who has supported and helped me over the years in more ways than I can count. It was JoAn who originally suggested that I write comments whenever I post news articles. She liked the information, comments and insights I added to the news articles.

The “book idea” came from Conrad Cockroft. He is a South African who is a regular reader of my website news articles. He presented me with an Ms Word document the other day which contained all these comments of mine which he had extracted from news articles I posted between February and April 2005. I was quite stunned and touched that he had gone to such lengths to extract my comments. It had never occurred to me that my comments and insights might interest some people. Conrad told me that he compiled them and was sending them to friends and family. He suggested that I turn my comments into a book! I am open to that idea if a publisher would be interested in them.

However, I have never had much luck with getting other people to publish my material, and the books I wrote I funded by myself. I can’t see myself doing that exercise again any time soon because it is too expensive. Also publishers mostly support people on the left of the political spectrum. If one is a conservative, then you are pretty much on your own.

I thought I would try another approach, that of creating an “Electronic Book” as an experiment to see how interested people really are in my political commentaries. It could also be a simple and cheap method of spreading the message around by allowing people to download this booklet.

I have been toying with finding other ways of spreading my original book, **Government by Deception**. I have been thinking of either giving bulk discounts for orders of 5 or more books, or later making it freely available on the Internet for downloading by anyone.

This could be an interesting experiment. On my website I already have a downloadable copy of a book the South African Government tried hard to suppress: “**The Great South African Land Scandal**” – which I encourage people to download and to spread far and wide.

I would like to build up an “Electronic Library” on my website, of books or booklets written by conservatives from anywhere in the world, which I will make freely available for download. So if you have material in Ms Word or PDF format which you would like to make available to other people, then drop me a line on my website, via the “Contact us” page which can be found under the menu: “Forums & Guest Book”. Don’t forget to leave your email address so that I can contact you.

I would also like to encourage people who support my site, to spread news articles around. You might not think that you are doing much by forwarding a few emails to friends, family and associates overseas, but you would be wrong. Robert Mugabe has spoken about the “Rhodesians and their World Wide Web”. He has said that this is a

powerful force. I think he is right. If it were not for “Rhodesians”, South Africans and others on the Internet, then Robert Mugabe’s actions of the last 5 years would not have become known to the world at large. He was doing all he could to suppress it – and he failed because of the Internet. Even the Liberal Mass Media eventually had no choice but to take note of the facts.

Similarly, South Africans opposed to the ANC should not let them get away with their lies and deception, and the news should be spread as far and wide as possible. The Internet is a very powerful mechanism which is beginning to super cede the Left-dominated Mass Media. Let’s face it: The Mass Media will never do anything to expose the insanity of Black Africa with its Socialist ambitions. It is up to common people like us, to each “do their bit”. If everyone sends news and joins the “News Web”, then we can change perceptions. Many people around the world realise that the Mass Media is heavily biased and that if they want to get another more frank or honest opinion then they must turn to the Internet. Millions of people across the world are joining the Internet daily and are turning more away from the Mass Media. So I would like to encourage you, your friends and your family to take part in spreading the news. Already, many South Africans and Zimbabweans have set up websites or mailing lists and they forward information around the world. They have achieved much, with little. If more people “do their bit”, then we certainly will have much to be hopeful for.

I wrote my book, and built my website because in 2000, I became heartily sick of the evil that was emanating from Zimbabwe and from the South African Government. I found that I just could not keep my mouth shut because if I did, I would explode. I am so sick to death of the lies and the twisted half-truths and propaganda which come out of the mouths of Black African Governments that I cannot keep silent.

If more people cared about the truth, then this world would be a better place. There is no hope whatsoever for Africa, or anyone in it, **least of all us Whites**, if we play along with our corrupt, power-hungry, Black racist rulers.

Look at Former President De Klerk who went around sucking up to the ANC. Look at Martinus Van Schalkwyk, the leader who inherited De Klerk’s National Party. Van Schalkwyk is the most spineless coward of a White man to ever walk in this country. And where did it all get them? The mighty National Party is dead and destroyed and was swallowed by the ANC. Where did all this “unity” and ass-kissing get them? Did they manage to change the ANC or this country for the better after selling their souls to the devil? **Definitely Not!!**

It is my belief that if we want to change things for the better, and if we want some sanity to prevail then we, as individuals, must start drawing lines in the sand and we must individually stand up and start to be counted. Spinelessness won’t save any of us. It won’t help us, nor our families and loved ones. Of course, we will be hated if we dare to stand our ground, but I think there is no other way. If one has no self-respect and pride, then one can be like Van Schalkwyk and one can grovel on one’s hands and knees before the ANC. The ANC literally jumped out of their skin with joy when Van Schalkwyk came

and begged them to save his worthless ass. The man is of course a complete fool, and if all of us are like him then there is absolutely no hope for any of us.

It is my belief that Mbeki's ANC, like Mugabe's ZANU(PF), has a hidden, racist, anti-White, Socialist, power-hungry agenda. I believe we will never be able to reason with them because logic – the way we understand it – is something one cannot use with them. Black Africa was ruined because power-hungry, paranoid, corrupt, incompetent Blacks ignored reality and logic. The same is true for South Africa. **The only way to save what is left of this country is to oppose the ANC at every twist and turn.** One should not be put off by their anger and hatred. In fact, if one makes them angry, then one must feel pleased because then you know you are doing something worthwhile and good for this country and everyone in it. They have crazy, unworkable ideas which they want to implement in this country. If they are successful, then they will send this country back into the Stone Age. That is what we need to stop. If they destroy this, the greatest country in Africa, then all of Africa will have no hope whatsoever.

In closing, I would like to thank again: JoAn Wilcox for her unstinting support; Conrad Cockcroft for this neat idea.

If people like this booklet, then please drop me a line on the Contact us page, and I will produce more of them for free distribution. Conrad suggested I produce them quarterly.

Feel free to download this and spread it as far and wide as you wish, in Electronic or printed format. Thank you for your support.

The Scourge of the ANC:

13 February 2005

I am happy to see that this new book, by Dr Dan Roodt, has just been published (8th February 2005). Its great seeing something like this hot off the presses.

Back in 2001, when I wrote "Government by Deception", I said that in my opinion, the ANC was the worst thing that had happened to this country in 350 years.

I stand by that.

And I have no doubt that what we've seen so far is as nothing... compared to what lies ahead... They have only ruled for eleven years... Give it another 5 or 10 years... and then we will see how much closer they have led this country into the Stone Age.

Here is how Black Socialist rule works: In the first few years... the country seems to be pretty much as it always was... but that is because it is, like a camel, "living off its fat" (from White rule)... But as time goes by... and there is no more "fat" left... so the country starts taking an ever steeper dive downwards... As time goes by... the dive just gets steeper as prior years of socialism and neglect finally take their toll. For example, weeks ago, we saw the first news stories about how Johannesburg's electricity infrastructure was collapsing. This no doubt is due to ten years of NEGLECT... which is now coming home to roost.

It never ceases to amaze me how blacks seem to think that INFRASTRUCTURE falls like manna from heaven!! Maybe it is because they are SPOILED ROTTEN by foreign donors that yes... to them... EVERYTHING FALLS LIKE MANA FROM HEAVEN!! Unlike us Whites... they can mismanage things... and get away with it... whereas we never had such luxuries and we had to plan and manage things properly.

In this country, everyone is too busy kissing the ANC's backside, to dare to come out and tell the truth... so a book like this is badly needed.

I wish Dan Roodt the best of luck with his new book. I hope people will spread the word around.

Black Zimbabwean farmer killed by an armful of landmines.

18 February 2005

[Those landmines were planted to keep Mugabe's Terrorists out of Rhodesia. Glad to see they're still around. I'm glad they blew up a black guy rather than an elephant... because of the extreme cruelty that blacks exhibit to animals all the time. Imagine an elephant which might have one of its legs blown off... and eventually it dies. Elephants and other fine creatures are killed horrifically by blacks all the time - especially now in Zimbabwe. Sometimes their trunks are half cut off from wire snares, etc... and creatures die slow, terrible, cruel deaths. Black cruelty to animals is legendary, and in this case, I think justice was done. For more graphic and horrific pictures... see the photos on my website. Jan]

The last moments of an abducted white girls life . . .

18 February 2005

[Normally Indians in South Africa are not big into crime. But this is a particularly sad one which caught the nation's imagination. A young white woman was abducted and randomed... and her parents did pay the R50,000 ransom... but the young Indian guy who abducted her... murdered her anyway. This story is about the last minutes of her life.

The culprit, of course deserves the death penalty - without question. But... Justice in this country is rarely served... and when it is... it is normally by accident. Jan]

Israel fires a warning shot over Iran's nuclear reactor?

18 February 2005

[Take note in this report of "Flying Object" fever in Iran... and its open links to US spy drones. Several years ago I wrote about UFOs and spy craft and my belief that many/most UFOs are really military pilotless spy craft.

The initial reports said eye witnesses saw a plane fire a missile... This seems to have been followed by a lame Iranian cover-up attempt.

It could be... an Israeli aircraft that did this... perhaps... like firing a warning shot across a bow.

If the USA does not deal with Iran fast enough... then Israel may well act first... So... the next Russian-manufactured crisis in the Middle East... is starting to accelerate faster...

Furthermore... Syria and Iran are starting to co-operate... This could get very interesting... As I believe... terrorists in Iraq will also slip into high gear in America's rear... if the USA goes into Iran... Jan]

Iran, Syria to form "United Front" against USA.

18 February 2005

[This could be the start of something akin to the "Frontline States" which the Blacks in Africa formed when facing Rhodesia and South Africa. The Arabs may start uniting against the USA too.

According to my Middle Eastern contacts, both Iran and Syria harbour and send terrorists into Iraq from across their borders - and the USA has even been thinking of launching quick cross-border raids into Syria to try and get to their camps. If the USA starts taking such action, it will bring back warm memories of the days when Rhodesia and South Africa did the same thing, for the same reasons - except, that the whole world jumped on our cases whenever we did it. I find it almost ironic, that bit by bit, the USA is finding itself confronted with a situation that is so similar to what we, and Israel have gone through.

From what I can see... this is just the beginning... It appears to me, that a wider war, raging across the Middle East, with the USA being in the thick of it, is just a matter of time. This war on terror is so very far from being over - in fact - its only just begun and at this stage, its just warming up nicely. The REAL ACTION... is coming closer... Jan]

CIA issues warning on Chinas military effort.

18 February 2005

[Robert Mugabe is a product of Communist China. The Chinese taught him and sponsored him. The tactics he uses in his country to control the black population are the same the Communist Chinese used during the "Cultural Revolution" where intellectuals and enemies of the state were wiped out.

Mugabe is no fool. One must give him credit - he knows which way the wind is blowing and he has said in recent years that he is turning towards Communist China. He is obviously feeling confident enough about China's increasing strength, to come out and openly side with them.

Even President Mbeki has recently indicated that we in South Africa will be following China's example. These are small but significant indications of changing loyalties as the smaller nations see the mighty USA weakening, and as more challenges arise against the USA. In my book, Government by Deception, I warned this would happen, and that if we ended up in a World War, most, if not all, of Black Africa will side with America's enemies.

Taiwan and Apartheid South Africa were very close. We supplied them with missiles. One hopes the USA can help keep them going... But the Communist Chinese are waiting for the moment when they can wipe Taiwan off the map - and I have no doubt that day will come - sadly.

Note how the war on terror... is now diverting US forces to other tasks... and this is giving the Communist Chinese their chance. I believe... the War on Terror... is but the BEGINNING... of America's enemies coming out of the woodwork... and that as time goes by... one will slowly and amazingly see... more and more nations quietly siding against the USA... and eventually... the USA will be busy on in so many places... it will struggle to fight on so many fronts at the same time. Wait... the Russians haven't even made their move yet... Nor has Europe. This is the military concept of overloading the enemy's defences... and I believe... this could happen. The next few years should prove to be extremely interesting. Jan]

2005: War clouds all over the Middle East.

18 February 2005

Information coming to me from the Middle East is that things there are hotting up there on all fronts... including inside Israel... where Civil war threatens...

It looks as if, as per my post at the end of 2004, as if 2005, is going to be an extremely interesting year.

Word just in is that the USA has bought 148 South African mine-protected vehicles.

2005 might just be a very exciting year... And I'm looking forward to it.

18 February 2005

[This is good to see. I mentioned this a while back and wondered why the USA isn't making use of some of our technology in their fight against terror... They're going to be needing it!!! A photo of the kind of vehicle they have bought, can be seen on the URL's below. Jan]

Collapsing education system threatens growth.

18 February 2005

USA: Segregation occurs naturally in Nebraska's schools.

21 February 2005-02-21

[Here you see Segregation occurring naturally, in a Politically Correct country, where the Whites think they are morally superior to us and therefore immune to the forces which drove us. It is a simple, practical fact of life that birds of a feather flock together. People will always seek out those they feel more comfortable with. Here we see segregation happening quietly, all by itself. Many Afrikaners have told me over the years that Apartheid occurs naturally all over the world. They have travelled abroad and seen it in action. The only difference was, that in South Africa, they dared to crystallise it by writing it down and forming laws around it. Apartheid was a scientific system, based on a valid and accurate interpretation of history, which recognised this basic human need for people to be with their own kind, and to live in their own culture. In reality, Apartheid was a "live-and-let-live" concept which acknowledged that not all people had the same values and aspirations and which allowed each to pursue life in the way they saw fit. Its real intention is completely non-oppressive. The problem with Blacks is - they can't live with Whites and they can't live without Whites. Blacks are failures - most of the time - and there is nothing Whites can do about this. Whether you are a Conservative White or a Liberal White, you will be unable to save the Black race. Only the Black Race can save themselves, one day when they decide to behave like Adults instead of the spoiled rotten, begging children which they are. Segregation is a normal, natural force that happens. And its not just whites who do it. Blacks and others are just as guilty of it. In my view, its no crime - its just human nature - and it is wrong to punish it. It is this same force which causes "nations" to form. There is nothing evil, or terrible about it - it is a simple fact of history which has been occurring since man walked upon the face of the Earth. Every race, on every continent has practised it - until in recent decades - some fools came and decided to ignore all of the lessons of millenia of human history. It is not White or Africans who were out of step with history, and the natural forces of life - it is Whites outside Africa, who decided to spit into the wind and who are going against the natural forces of human nature. I expect that in the fullness of time, their experiment will fail - and by that time - their countries will be ruled by blacks and coloureds!! Jan]

S. Africa's latest lies about Democracy in Zimbabwe:

21 February 2005

[The following is a letter from a friend of mine which was published in the Cape Times. It is common for the S.African Government to misrepresent (lie actually!!) the situation in Zimbabwe. When it comes to foreign policy, the S.African Govt are masters at lying!! Jan]

S. African Government's unreasonable pay demands from White farmers:

21 February 2005

[This is a press release from the Transvaal Agricultural Union - the biggest agricultural union in South Africa. Note how, the Govt expects White farmers, who are suffering from drought, to give black employees a pay rise which is more than double what the gov't is prepared to give to its own employees. To me, this just reflects their typical attitude of doing all they can to harm White farmers and to drive them into bankruptcy (as if the farm murders and Land Reform theft hasn't already done enough damage). Jan]

Did Iraqi election boomerang on the USA?

21 February 2005

[This is fascinating, and yet it does not surprise me. The US Government has a way of backing the wrong people... They did it all over Africa... and now in the Middle East too. For me... the USA sucking up to the ANC in South Africa, is an example of getting it all wrong... so it does not surprise me to see the USA gauging the Middle East wrongly. That Arab Liberals were wiped out... is a perfect example of how one cannot expect the rest of the world to think in the same way. So it looks as if... many billions went down the drain for little or no benefit. Jan]

S. African Communist Party: Democracy at risk in Zimbabwe poll:

21 February 2005

[I believe what we are seeing here is Black-on-Black DECEPTION. This is quite bizarre. But I think something deeper is cooking here. The ANC's two allies: S.African Communist Party and COSATU, are both appearing to stand against Mugabe. As utterly bizarre as this action appears, it may be part of a bigger plan. The ANC does not exist in isolation. It is part of the Tripartite Alliance - which is basically the bigger communist structure which it is part of. The 3 elements of that alliance ALWAYS work firmly together. It could be that this is why COSATU and SACP are [mock?] criticising Mugabe... while the ANC in Govt... stands firmly by Mugabe. It could be... to help try to keep the faith of BLACKS in South Africa... so that they continue to believe in our "democratic principles".

Personally... I don't see any of this as being other than a lot of talk, talk, talk - which will ultimately lead to nothing... and in the end... Mugabe will win, and all the South African groups (Tripartite alliance, et al) will walk away... leaving Mugabe in power. Nothing CONCRETE will actually be done.

I do believe... segments of this alliance, like COSATU, are trying to befriend the renegade Trade Union elements in Zimbabwe which make up the opposition to Mugabe.

I believe this merely a lot of POLITICAL DECEPTION... to mask the fact that deep down, the Tripartite Alliance is firmly on Mugabe's side. I think this is part of a bigger act, to draw in Zimbabwe's opposition, to befriend COSATU and the SACP. Later... when the time is right... COSATU and the SACP will stand back and allow the MDC in Zimbabwe to be slaughtered. To

me... this is black-on-black deception. Power to them... I certainly couldn't give half a hoot who wins... all I know is Mugabe will come out of this tops - in the end. Jan]

How Blacks lie and deceive other Blacks:

21 February 2005

I'm watching in fascination how COSATU and the S. African Communist Party seem to be courting the black Zimbabwean opposition. I see COSATU is talking of blockading Zimbabwe!!

It sounds all so melodramatic and great.

But the bit of time I spent with the Zimbabweans, and digging around S. African Politics... I believe this is all just a fake act.

It is my view, that they are really out to deceive the blacks who oppose Mugabe. I know, from my meetings with the black Zimbabweans 2 years ago - that they were trying to get in with ANC-related groups. However, I warned them, that the ANC were commies and were really on Mugabe's side.

I won't go into the details, but during a series of incidents, the leader of the black Zimbabweans was called in to be questioned by the ANC Intelligence. Shortly thereafter... a rift occurred between myself and the black Zimbabweans... and within a few months... we parted company for good. I certainly will never support the black Zimbabweans ever again.

However, I am CONVINCED, to this day, that the ANC fed them info about me - probably from all my emails which they have been reading and filing away. I believe, that part of the purpose of those meetings was to turn them against me. And I must take my hat off to the ANC - they certainly succeeded admirably in driving a wedge between myself and the black Zimbabweans.

In recent months, I heard rumours that the black Zimbabweans were once more trying to raise an awareness in South Africa about Mugabe... and one rumour had it that they had a rally at... COSATU House in Johannesburg.

So this set me thinking... and adds to my suspicions, that the ANC's allies (The South African Communist Party and COSATU)... are trying to befriend the Zimbabwean opposition. Why?

Well... last time... the Zimbabweans came to WHITES in South Africa... looking for help. And whites did give a lot of money. They probably are playing the role of trying to pretend to befriend the Zimbabweans... but deep down... will really betray them and do nothing.

I am quite certain... that the Black Zimbabweans will fall for this charade... hook-line-and-sinker. They will think that indeed... they are making headway... with members of the Tripartite Alliance.

However, I want to put it on record, that I firmly believe... that my advice and words to those Zimbabweans will one day be proven true... when the ANC and its Tripartite Alliance members... abandon or assist Mugabe in destroying his opposition.

It does not matter that I am a "White Racist" - the truth is - I told the truth to the Black Zimbabweans. They obviously never believed me - not after the ANC Intelligence people got hold of their minds. But... I believe firmly... that all these games... will lead NOWHERE... and in the end... Mugabe will be sitting pretty... and the Black Opposition to Mugabe will have gone NOWHERE.

[I am fascinated by the references to the Home Coming Revolution. I am trying to determine what exactly is the problem, and the lies which come from them or relate to them. Some really good stuff in this newsletter. The Springbok club deals with both South Africans and Rhodesians and is situated in Britain. Its really nice to see both groups working together.

The Unbelievable Wealth and Corruption of Black African leaders:

22 February 2005

[This is an extremely important article, written by a very knowledgeable businessman - an "Insider" if you will. This is the sort of thing I'd love to spread around the world if it were in my power. It highlights the incredible wealth of Black African leaders... who merrily steal vast sums of money, while keeping their people poor.

Take special note in this article, of how South Africa's Rand has been over-valued recently. This has been something of a mystery to me. I was wondering how they managed to pull it off. I had a theory (nothing more than speculation really) as to whether certain funds were being transferred into South Africa - perhaps by massive criminal syndicates. Interestingly, Eddie Cross, who is a most experienced businessman, has also spotted the mysterious over-valuing of the South African Rand - and he has some ideas as to the real purpose behind it. Eddie Cross has a position in the Movement for Democratic Change in Zimbabwe. He is a noted businessman in that country, and won the businessman of the year award once. Jan]

Nothing except Armed Force... will fix the situation in Zimbabwe. The USA and UK should have armed Mugabe's opposition... and started a war. S. Africa: too many rich Whites:

23 February 2005

[Here is the testimony of a British fool, who thought Whites in Africa were rich because they spent their lives stealing from, and oppressing the blacks. Meanwhile... Whites just happen to be more intelligent, diligent and organised, and that's why they almost always outperform blacks financially. This idiot, like so many others... bought into the stupid line... pedalled across the world... that to destroy Apartheid and Whites... was to help Blacks. Ditto for the dopes who believed the same for Colonialism.

But... this stupid kind of thinking... will one day be the very same thing that leads us in South Africa into the same kind of debacle which has struck Zimbabwe. When 15, 20 or more years have passed... and the ANC Socialism has made blacks even poorer... while Whites are still managing to survive... Some dope will come up with the idea that the "final solution"... is to steal everything from the Whites... like happened in Zimbabwe. This Govt sits with an insurmountable problem... that their entire party line... is a failure... a proven failure... even before it is applied. In the end, they will have to take desperate, crazy, racist measures... to blame the Whites and turn the Blacks on us... in order to "help the blacks"... just like Mugabe is doing. Its all communism... its all insanity... and none of it... will help the blacks.

I still say, that the "Liberation of Africa", has probably set Black African development back by about 100 years. If they had worked with the Whites... things would have been so much better for everyone. Instead... there is this stupid, stupid "thinking" as exhibited by this British fool. Jan]

The Jews have survived millenia of persecution and have in all that time, not been assimilated into other cultures. Even the Soviets could not get Jews to relinquish their culture. The determination of Right-Wing Jews to stay true to their holy scriptures borders on the fanatical. I find this to be a very hopeful sign... I hope they manage to overthrow the Sharon Government which is determined to surrender... This year in Israel promises to be a most fascinating one. Jan]

Putin lies into Bush's face:

25 February 2005

[Even now, the Russians are exhibiting their reluctance to stand by their "agreements" with the USA. One can see that they're only paying lip service to the USA's requests... and that these agreements will amount to nothing.

Rest assured, the Russian missiles sold to Syria will find their way into Iraq and other theatres where American and even Israeli aircraft may be shot down.

It is interesting to see how Putin the Communist is strangling freedoms in Russia and slowly, but surely recreating the Soviet state.

I've always believed that Putin means business, and he is probably the most dangerous leader the Russians have had in my lifetime. He is a new Lenin... a very intelligent... very dangerous man... Jan]

USA: HIV Infection rate among Blacks double:

26 February 2005

[Once again we see the "incredible" (if you were a liberal)... as we see parallels between Africa and the USA. In South Africa, we have known since day one, that HIV spreads faster among blacks than whites... But .. our black Govt. can't accept this fact... so... much fudging, etc has been done to cover up this fact. All we said was: It is a fact that blacks are more promiscuous... therefore an STD will transmit faster through their population. But it seems, blacks can't handle this fact and therefore it had to be covered up. Now we see the same trend emerging in the USA. What's the bet, that it is happening among virtually all black populations where ever they live? So once again... we see "racial truths" remaining constant, regardless of which country you live in and regardless of whether Apartheid or Colonialism ever existed there. Jan]

News Alert: S. Africa: Racist Attack: Black children murder Muslim child:

26 February 2005

[Although this is an openly racist attack, this was not the screaming headline on S.African websites. E-Tv, an independent TV station here in SA, did however come out and openly called this a racist act. Of course... you won't be seeing this spread across the planet as a racist act. If it were 5 white kids, who killed a black kid in a racially motivated attack... you would have seen this everywhere.

However, this is a case of racial tensions between blacks and coloured (brown) people. In Africa, coloured refers to "half-breeds" - the group of people who are of both black and white ancestry. They have become a cultural group all of their own - and they have racial tensions with blacks. Interestingly enough, coloured voting patterns are almost similar to whites... and they even voted in the National Party (known as the former Apartheid Govt) AFTER 1994... Plus... coloured people like to identify with Afrikaners and they most of them prefer to speak Afrikaans to English.

There is a lot of racial tension between blacks and coloureds. Many coloureds are also Muslims.

On E-Tv, they interviewed a coloured girl, who said that the blacks had threatened them, and the blacks had said to them: "Your day is coming"...

News Alert: S. Africa: Mega-land claim: 263 Land owners affected and Nuclear Power station:

26 February 2005

The article is on another site at this link:
http://www.AfricanCrisis.org/ph_BroederStroom.asp

Here is an example of a Super-Land Claim. Despite its enormous size, not one peep about a claim such as this is ever mentioned in the media - and even less is heard about this outside of South Africa.

The only reason I know about this is because a co-worker of mine is one of the 263 owners who stands to lose his property in this land claim.

As at February 2005, there are still 20,000 Land Claims to be settled in South Africa. 57,000 have been processed so far!!

The affected properties in this case, lie outside Pretoria. The owners are busy trying to estimate the total value of their properties. My co-worker estimates (thumb suck) that the total value may be a billion Rand or more for the properties which are in this one land claim!!

To put this in perspective, the South African government only has R810 million available this year for ALL the Land Claims which it will be processing this year. The entire budget for Land Claims therefore is less than the value of this one claim alone. Apparently, this claim also covers land where a **nuclear power station was built!!!**

The owners involved in this land claim have hired themselves one of the best Land Claims attorneys in the country. They will attempt to keep their properties - if the law allows them the chance. If this is not possible... then they will simply have to accept whatever amount of money the Government decides to pay them. My co-worker has resigned himself to the fate that there is a good chance he will lose his property.

The owners of these properties are going to do everything they can within the bounds of the law. But they know they stand very little chance.

They did set up a website giving details of the land claim. They also have a bank a/c where money can be donated to them. All the details of this can be seen on their website. They do have regular meetings and newsletters, and you can follow their progress in the coming months by going to their website.

Don't forget to download a free copy of the book: **The Great South African Land Scandal**. This book was written by one of the top Land Claims attorney's in South Africa and it shows the inside story of what happens to land that has been acquired in the Land Claims process. News Alert: Mugabe: We must bury Tony Blair . . . 12 feet under . . . :

26 February 2005

Tonight on E-TV news, they had a piece about Mugabe's birthday. Mugabe gave a speech attacking Tony Blair. In it Mugabe said: "We must bury an effigy of Tony Blair... 12 feet deep... with the Union Jack..." He went on to say that they [the blacks] must say: "Here lies Imperialism... NEVER TO RISE AGAIN!"

I like Mugabe... he is full of hatred for White people... But its good. I was thinking to myself: "Yes you old Black bastard... Your rotten tin pot nations will be conquered again... If not by Whites then

by Asians... Don't be too arrogant... One day you arrogant Blacks will get your butts kicked by someone who is stronger than you..."

I can't help smiling... The more the Blacks follow their socialism... the more they are weakening their own continent, thereby inviting future conquest.

A family member of mine who lives in White River (north east South Africa) was telling my mother that in that little town, the Whites are so poor, while the Blacks are well-dressed and drive fancy cars. This family member of mine used to be very wealthy. In fact, that side of our family were the richest of all of us. They were multi-millionaires and lived the life. They travelled the world. But... in South Africa's stagnant economy... their business went bankrupt. Now they're ruined. They were also the Liberals in our family, never believing that bad things could happen to this country, much less to them. Anyway... now they're on skid row...

With regard to Blacks weakening this country through their socialism, I had to laugh the other day. It was said on the TV News that "Social welfare is becoming too expensive..." I just smiled and shook my head. It is amazing that in this country people can say the most senseless things with a straight face... Yes, you stupid morons... I thought... Anyone with brains could have told you on day one, that Socialism is a case of throwing good money after bad... into a bottomless pit... from whence it will never emerge. Even more importantly... that is money which could have been spent on worthwhile infrastructure and developments which could have pushed the country forward... but you dopes went and wasted it... and it will never come back again.

I love it. This is why I believe that Mugabe, the ANC, and all this Liberation of Africa has been such an exercise in complete foolishness that the whole world is passing us by... and within a few decades... other countries, from almost any corner of the globe will be so strong, compared to us, that virtually anyone will be able to invade Africa.

Go ahead Mugabe... you Communist bastard... mock the British Imperialists. I was there, you lying scum, and the British and their descendents did more for that country in 90 years... than you useless Blacks could do in 10,000 years. Hate the Whites all you want... but you are digging your own grave... One day... some race... (maybe the Chinese?) will enslave you Blacks again... and they won't be as nice as the Whites were.

News Alert: USA: Black terror on White High school kids . . .:

28 February 2005

[This is a fascinating post from a White girl in America. The remainder of this discussion can be seen at the URL below, where a young White guy replies to her and says sensible things. Its a pretty adult discussion...

My only difference with them is on the issue of the Jews. Its not the Jews who run around beating people up. Its not the Jews who are filthy or lazy. Indeed, Jews are the very opposite. Sadly, there is lots and *LOTS* of conspiracy rubbish floating around about the Jews... much of it originally came from Russians and various communists. Unfortunately, the Jewish tripe has gained precedence in the Right Wing - and that's something I am firmly against.

In Africa, Whites, especially Afrikaners, have traditionally strong ties for, and sympathies with the Jews in Israel. I don't agree with the many Liberal Jews who float around (especially in the USA) - but I find myself in firm agreement with the Conservative and Right Wing Jews in Israel. They have always been our friends and worked closely with us.

Traditionally, there has never been anti-semitism among Afrikaners.

My beef with blacks is not because they are black... it is because of the hell they bring with them... their insistence at ignoring logic... and the way in which they bring barbarism into their own lives... and then into ours too... Their mindset and their behaviour is what irritates me. The Jews are completely at the other end of the scale. Whereas Blacks are failures, Jews are super-achievers. The two groups couldn't be further apart.

Nevertheless, this girl writes about the terror in her school, brought on by blacks. It seems to be a common thing in the USA. Jan]

News Alert: Russia to sell 100 tons of nuke fuel – Iran can build 30 nukes per annum:

28 February 2005

[I have said time and again, the main trouble-makers in the Middle East are the Russians. The Russians built the nuclear reactor... right in front of everyone's face... The Russians are the PRIMARY CREATORS of all the trouble in the Middle East... and are the creators of the very troublesome nations the USA is attacking. The Russians are doing this, right before your very eyes...

And it is these same Russians, who are arming the enemies of Israel... who ALSO happen to be the purveyors and peddlers of anti-semitism on the planet. There is a concept called the: "Red/Brown Convergence"... where the Communists and NAZIs come together... and one sees this in the far right wing... where the Communists have successfully peddled their hatred of

Jews... Where communists have created the LIE, that Jews created communism... Its all rubbish. The Russians have a tradition of drawing hate upon their enemies. They did it with Whites in Africa, with Afrikaners... and they do it against the Jews in Israel too. Jan]

News Alert: Lion Murder: Why did lions leave "tasty morsal" behind?

02 March 2005

[The Pathologist now points out a fascinating fact: Why did the finger, and only the finger, with the thumb, appear on the crime scene... unscathed... The entire body had been eaten by the Lions... but the finger remained untouched. It also appears, the finger was not on the crime scene when other photos were taken... and when the finger appeared... it was this finger only... that was used to identify the black victim... meanwhile, DNA from the bones, etc... was not used... So... does the finger belong to the same body as the bones on the crime scene?

It looks to me... as I said in the beginning... that now one can see... evidence was planted... to frame this White guy.

I will post another news report on the same issue... because clearly... something is very strange here...

Furthermore, THE CITIZEN newspaper reported that whoever was eaten by the Lions... was already dead... In other words, the whole story about the black man being eaten alive by Lions... is complete junk.

Now we see... other evidence showing... that we don't even really know whose bones are there... The "body" was identified by using the strange finger... (which it seems lay there for months...?).

I suspected from the beginning that this is largely a propaganda exercise... because of the SA Communist Party, and the ANC being so openly involved...

Whether this White man will get a fair trial is another business.

It does appear as if the White man and two black accomplices murdered another black man... but whether the body in the Lion enclosure is that man... is another thing... There is lots of weirdness in this trial. Jan]

How provocateurs work in the Israeli Right Wing:

02 March 2005

[Here is a fascinating news item showing how the Shin Bet (Israel's internal security) use provocateurs to penetrate their Right Wing and screw up their conservatives. This article is most interesting in its description of the methods used to penetrate the Right Wing and use people to incite other people.

Here in South Africa, this trick has been in use for over 20 years - under both white and black rule. These tricksters can be found all over the Right Wing/Conservative landscape... In South Africa, these bastards, are Whites who pose as conservatives... they may be male or female... and their job is to mislead you and to trick you... This news article shows how the Right Wing Jews are trying to deal with their provocateurs.

In South Africa, there are dozens of White males sitting in prison because of the White Scum who misled them and betrayed them. Of course, it says something about the White Scum who work for the ANC... because clearly... underneath all that bravado and big talk... THEY ARE THE

BIGGEST COWARDS AND SELL OUTS OF ALL!!! I hope the Blacks kill them one day... when they no longer have any use for them. Jan]

03 March 2005

[I don't think the wars in the Middle East are anywhere close to finished. The oil price today hit \$53 a barrel, and Iran threatens that global oil prices could hit \$80 in 2 years. It is possible, that a massive Middle East conflict will send oil prices higher around the world. South Africa is partly shielded from this due to its oil-from-coal at Sasol... The USA also has enormous amounts of untapped oil lying in Alaska. Personally, I think the world would be better off if there was less dependance upon the Middle East... and the Arabs would then also not be in a position to engage in the games they do now. If they were poorer, they would probably also learn to leave Israel alone. Jan]

The Best News Ever: Atheism in decline worldwide:

04 March 2005

[To me, this is the best news imaginable. Even though they say there is an increase in paganism, I see no problem with that... because it means people are thinking in a spiritual way and are changing. I think the most important fact is that people are searching their hearts for the truth - and even intellectuals are finally concluding that athiesm cannot be the truth.

Some years ago, when I was interviewed by Art Bell himself, I made a statement about the "athiest scientists"... and Art Bell expressed shock and tried to paper over what I had said. He said in effect, I was "spitting out" the phrase athiest. Indeed I was. Isn't is amazing to see that in the meantime... those people have actually been changing!?

I also mentioned, in my writings, that Leonard Euler, the greatest mathematical genius of all time, and the originator of most modern mathematics said that the universe is too complicated for it to be accounted for by accident. Euler was an ardent Christian and read the Bible to his family every day.

I agree with Eule.... and it is excellent to see how many intellectuals are now coming around to seeing this fact. Our amazing science is showing us... that things are too unbelievably complex for any of this to have been caused by an accident. Maybe 100, or 150 years ago, when fools like Marx roamed around... and the world was more backward... it may have appeared (if you were an idiot!) that all life could be accounted for by freakish accidents of probability. But as we acquire telescopes, and atomic microscopes... and we delve into chemisty, biology and the physical

sciences... so we see that all this is so unbelievably complex that no accident could ever account for any of this.

Whether God is a Christian or a Jew, or all of the above... who knows... But there can be no question in my mind that extreme intelligence is behind the workings of our universe.

All I would like to see... in the end... is the destruction of Communism and the wiping out of socialism. These insane philosophies are also the products of athiesm.

I am so happy to see this move away from athiesm. About 10 years ago, Jeff Nyquist and I had a discussion about the future of the world. Jeff Nyquist expressed the view, that a World War, would result in a United States which would be so conservative that it would be akin to the far right of today. I pondered this... and I agree. I think it is quite possible for a World War to result in a future world which would be EXTREMELY RIGHT WING by today's standards. In the USA, and around the world, one sees, a grass roots fledgling Right Wing rising everywhere. It is born of religion and also from people who realise that there are racial differences, etc. In my view, Apartheid itself, cannot die forever because a lot of the concepts inside it were based on valid historical and scientific facts.

The ANC in South Africa on the other hand... could in the end... just be a flash in the pan... Its future is by no means assured. If global trends continue... the future could be very different to what the Liberals and the far left have been working for. It appears to me there is a backlash against many of these leftwing concepts.

Look at the Soviet Union. They tried to take women and turn them into men. Have you met any Russian women in the last few years? You'll find that almost without exception, they are very feminine and enjoy being feminine.

The Soviet Union tried to wipe out the Jewish culture. Jews were sent to Siberia for passing their culture on to their children. And yet... the Jewish culture did not die. Indeed, the Russians are only too happy to export the pesky Jews out of their country... because they just could not break their will. Those Jews now live in Israel, and they hate Russia with a passion!!

If the viciousness of the Soviet Union, could not conquer human nature... in women, or in Jews... then it may show that in the end it will fail.

Socialism is illogical. Its like spitting into the wind. The Communists, and Athiests spat into the wind... They are destined to fail - completely.

All I would like to see one day... and I certainly hope I live to see this... is bulldozers burying the communists we kill in the next war in mass graves. Then I will know that we finally defeated these people who went against every aspect of human nature and logic. They flaunted and ignored every lesson history had taught us over thousands of years. I would like to see these people who spat in the face of God and who wanted to turn the world into athiest barbarians - dead. When they are dead and gone, the world will be a much more peaceful place, and the rest of us can progress forward happily. Jan]

people makes up a tiny portion of Africa's entire population - which is probably 600-800 million. So it could be that right now... there are 100 million people already HIV+. So the reality could be many times worse than this report makes out. God's grim reaper is going to be extremely busy in Africa. Jan]

News Alert: South African Jews emigrate to Israel in record numbers:

06 March 2005

[The following is from a newsletter of the Zionist Federation. From what I can understand of this, the term "Aliyah" means they went to Israel. Interestingly, in percentage terms, the people leaving South Africa at the fastest rate since 1994 and "the End of Apartheid" - are actually the Jews!! Anywhere from 50-60+% of South African Jews have left South Africa in the last 10 years (exact figures are not available). The news item below indicates that ever increasing numbers of South African Jews are preferring to go to Israel.

Remember, the Bible states that a sure sign of the End Times is when the Jews return to Israel. Jews have been returning there for the last 100 years, and the rate seems to be increasing. Jan]

Important: S. A. Study: Whites see crime as ethnic cleansing:

06 March 2005

[This is very important. Back in 2001, in my book, Government by Deception, I described the mass black-on-white crime in South Africa as a "Clandestine War on White People".

The murder of over 1,600 White farmers in South Africa in the last 10 years has caused the farmers to regard themselves as the victims of ethnic cleansing.

However, this study below, deals with Whites in an urban setting - in this case - Johannesburg. This study below is most interesting because it shows that deep down, many Whites feel that we as a group are under attack by blacks. No doubt the many studies, and personal incidents of crime which most of us have experienced have led many Whites, as a group, to realise that we are the targets of violent crimes in an attempt to drive us out of the country.

Note also the mention of walled communities as "castles". I have mentioned this in the past. In Modern South Africa, we are returning to the mentality and methods of the lawless Middle Ages - where everyone has to protect themselves with walls - because there is no Government protecting us. In many parts of Johannesburg, they have blocked off access roads, and set up "walled" suburbs which are protected by booms and security guards.

"Villages" - which are surrounded by walls 8 or 10 feet high, often with electric fences on top, are a common sight. There are very few houses left in Johannesburg that don't have a 6 foot fences or 6 foot walls around them (often with razor wire or electric fencing on top).

I have been convinced for a very long time that crime is politically motivated - even though officially they would laugh at you and call you crazy for saying so. But as can be seen from this study - I am not alone in thinking this. That Whites bear the brunt of extremely violent crimes is common knowledge. And most of the crime in this country is Black on White. I have posted news articles in the past where Black criminals have openly admitted to targetting Whites specifically.

I believe, like many others, that this "Crime Wave" which we experience in South Africa is really just another type of terrorism which aims to drive White people out of the country. If you ask any Whites who emigrated, why they did so - 9 out of 10 will respond with one word: Crime. About 1 million (out of 5 million) Whites have left South Africa in the last 20 years. A recent article by Dr Dan Roodt stated that there are 32,000 murders in South African annually.

Despite this massive crime wave, Whites are not leaving en masse for various practical reasons. Many simply can't afford to, and many simply can't find a country which will admit them. Others feel that we have a right to be here and we should not leave under any circumstances.

It is interesting to see how many Whites also say they long for a European style of life. This is an example of why Blacks and Whites in Africa won't be able to co-exist forever. Eventually, Whites want peace, and Law and Order and CIVILISATION - and that is something you just cannot find in any Black-dominated society on Earth. Eventually Whites will want to do their own thing. It may take them 10 or 20 years to realise this... but one day... they will get sick and tired of being kicked around by blacks.

In the article below: CSIR = Council for Scientific and Industrial Research. Jan]

German Immigrant: South Africa would be great WITHOUT BLACKS!!!:

09 March 2005

Today I had an interesting discussion with a German lady here in Johannesburg. This discussion highlights many issues I have raised in past posts about blacks and whites in Africa.

The discussion began innocently enough. I popped in to her home-run business to collect an item. She said to me, "Don't park in the street, or the blacks will steal your car."

Then she started explaining why she was so concerned about theft in her neighbourhood. She said that someone had looked after her house for two evenings and that on the second evening blacks had climbed over her 6 foot wall and stolen the sound system out of the car.

The next day she saw a black Policeman in the neighbourhood and reported it to him. His nonchalant response was: "I can't do anything... there were five robberies in your street in the last few days!!"

She was getting angrier and angrier as she spoke about crime. The German woman wasn't old - probably in her early 40's. But she was angry... Then she started telling me about two young boys she knows. They were in their late teens - about 18 or 19. They were at home alone in a suburb not far away. That evening they heard a noise as some blacks were trying to steal a car outside... so the two young guys walked out to confront the blacks. But the four blacks were armed. They shot the one boy in the head and he died on the spot. They shot the other one as he was running away. They hit him in his lower back... and he is still in a coma.

The German lady got so furious about what the blacks did to those white boys. She said: "I don't mind them stealing a car, but all this unnecessary KILLING!!" She was so enraged. She said, "I hate the blacks! I HATE them! I wish we could kill them all! AIDS is NOT killing them FAST ENOUGH!! We will never get rid of them!"

I asked her how long she had lived in South Africa. She said she and her husband had left Germany in 1989. They had German friends in South Africa who had lived here for some years, who loved it here. So they decided to come here. They came here with a pre-paid return ticket to Germany which was valid for 6 months. They had 50,000 DM in cash here - along with their new home, etc. They were going to live here for 6 months and would then decide whether they wanted to stay permanently or not.

Then one night, after they had only been in South Africa for two months, the blacks broke into their home and STOLE EVERYTHING!! The blacks even stole their return air ticket to Germany and their 50,000 DM in cash! They were ruined. Her husband only had R20 in his pocket. That was in 1989.

I then told her of another couple I knew who also had a very nasty introduction to South Africa. I know a British woman who was married to an extremely wealthy German. They had travelled the world a great deal. But her German husband wanted to settle in South Africa. They moved here in 1984. They had only been here a few months when criminals shot the German man dead.

The German lady ranted on about the blacks. She said: "They're so lazy. They know how to steal, but you can't get them to do anything else. They don't work. THERE IS NOTHING YOU CAN DO WITH THEM!" Then she said it: "South Africa is a GREAT COUNTRY! I love this country. It has a wonderful climate, everything about this country is fantastic - EXCEPT FOR THE BLACKS!!"

She basically said that in her view, the blacks were the single thing that ruined this country! I smiled and nodded in agreement. Its a conclusion I have come to myself.

She said she couldn't understand why the Whites did not stand together.

Then she said, "If this was Germany, we'd sort these criminals out." She said, her husband had vowed to kill the next black criminal who gets in their property. Of course, I have heard many whites say the same thing. Eventually one gets so fed up with criminals.

She said "We should cut their hands off! If they don't have hands, then they can't climb over the walls and then they can't STEAL!!"

Let me digress. It reminds me of a discussion in my workplace many years ago. I remember someone saying: "We should be like the Muslims and cut a man's right hand off if he steals!" Then my boss piped up and said: "Yes, but then everyone in SOWETO would be missing a hand!!"

Back to the German lady: Then she said: "We should have a Hitler in this country - just a LITTLE HITLER. We need a Little Hitler in South Africa to sort out these criminals and put them in their place, or else there is no hope."

She was so frustrated and angry with crime. She said "The Government always says crime is going down... I don't believe that... Its BULLSH*T!"

I said to her, "I'm sure the Government knows what is happening, but in my view, they want crime... they love crime... because it is aimed at driving us out of this country. Crime is a type of terrorism aimed at white people."

This impromptu discussion which arose between myself and this German woman illustrates a number of points which I have mentioned in the past. Firstly, it is quite amazing how whites from overseas change once they have lived in Africa for quite a while. Once they live among a black majority and get to observe them close up for a time, they start to realise many things, and they lose their "innocence" and goodwill towards black Africans. Eventually they see the faults and flaws of the blacks and they realise why black societies are such a mess.

Whites become racists because they see why blacks fail and they become extremely frustrated when blacks don't want to listen to their advice on how to fix things. This is the root of all racism - the failure of blacks to maintain the standards which we set and which we live by. Without these standards, one loses all the benefits of civilisation. Whites eventually get fed up with the failure of blacks to maintain standards.

Secondly, as I have said many times: There is nothing wrong with Africa itself. Africa is really a great place. It is amazing how whites love Africa. It is not Whites who willingly flee from Africa. It is blacks who do. Whites on the other hand only leave Africa on pain of death. I can tell many

stories about how whites from other countries came to Africa and fell in love with the place. Most whites who live here, look at Africa and think: Wow... this is a great place with awesome potential. Is it any wonder that where ever in Africa whites go, the place soon blossoms? Whites see potential everywhere in Africa. But Blacks don't see the potential and possibilities which we see. The blacks on the other hand... starve to death amid plenty... The blacks die in the Land of Milk and Honey... and to top it all, they run around, blaming the rest of the world for their own failures and begging from people all over the world!!

As I have said in the past, Africa is a great continent, with amazing potential, incredible ecosystems, and incredible untapped wealth. The problem, is not Africa. The problem is not the animals nor the plants. The PROBLEM is, Black people. Black people... are the reason Africa is Hell on Earth. There is no other reason. Where ever White people went in Africa... or where Asian people touched Africa... it blossomed. Remove the White people... and things stagnate and die.

And this German woman's 15 years in South Africa taught her that. But I have heard similar stories from many other whites over the years. It did not matter whether they came from Germany, or Britain or Austria... In the end... they turned around and *HATED* the blacks with a passion.

My barber is a Portuguese man. He came to Africa in the 1960's. He was called up to fight in Angola. He loved Angola. He said to me: "Angola is more beautiful and richer than South Africa!" (Angola, for your info is 1/4 the size of Europe. It has oil and diamonds and is very fertile). The Portuguese colonies in Africa bloomed... until the blacks took over. Angola descended into a Hell within a Hell. On a continent of Hell Holes, Angola became one of the very worst. Yet, as my barber said, within living memory, it was an incredible country.

Why do whites end up hating black Africans? Because they can see that the blacks just are not getting down and doing the things which make a society work. Eventually, as I said in my article so long ago, "Why Black people struggle", non-black people realise that blacks are their own worst enemies. Black societies fail - because of black people. Its that simple.

It was interesting seeing, yet again, how someone from Europe eventually freaked out when she realised that we are living amongst lawless barbarians. What separates us from blacks, apart from our intelligence and discipline, is another factor: The Rule of Law. White people are extremely insistent upon Laws, and punishment (and rightly so). But as the Laws of the White man are removed, or ignored, or a blind eye turned to them... so does the Barbarian inside Blacks come out... to haunt all of us... And it drives some of us virtually crazy.

Yeah, I have to agree with the German woman: South Africa is a great country, with fantastic prospects, except for one huge drawback: The Blacks!! Rest assured, as they increase their power and their hold on this country they will ruin the finest country that ever existed on this continent, just like they have ruined the dozens of other fine countries which existed in Africa. As I said to the German woman: This has been going on for decades - you would think that by now everyone has learned the lesson that black Africans, if left to themselves, will destroy everything in their path.

Sadly... the lesson does not seem to have been learned yet.

But I remain confident, that the fake principles on which the "New South Africa" is founded... will yet come unstuck. My chat with the German lady, like so many other chats I have had with whites who came here from Europe, has shown me that Racism will live on and grow stronger as more and more whites begin to realise what losers black Africans are. Even if all the Whites in Africa were to be wiped out tomorrow... racism will simply rise from the dead elsewhere. Blacks and Whites will just *NEVER* see eye to eye. There is no doubt in my mind that that's the way it will always be. Jan]

S. Africa: Capital City name to be changed:

09 March 2005

[Well, it eventually came... despite various denials. They went and amalgamated Pretoria with various black townships and then eventually slipped the name change in. Now some Afrikaners are fighting it. I seriously doubt they will achieve anything. It has been estimated the name change and its marketing will cost about R1 billion.

I still wonder if Johannesburg will have its name changed. I'm sure other cities with Afrikaans names will definitely be changed, such as Bloemfontein. Many have already been changed - for example, Pietersburg is now Polokwane.

I have wondered if in the end, they will change the name of the country from South Africa to Azania?

Rest assured that anything with the slightest link to Afrikaners will be wiped away... for the foreseeable future... Jan]

News Alert: Mugabe: S.African Rightwing always target Zimbabwe:

12 March 2005

[By "Right Wing", Mugabe also includes outright Liberals such as Tony Leon, etc. Yes you old Communist bastard... If only we had teeth... what a joy it would be to bite a chunk out of you, you arrogant old scumbag! Sadly... we have none and we have to watch you get away with everything.

Note how the ANC supports Mugabe's "struggle for the liberation of Zimbabwe". That's their wording... Liberation of Zimbabwe? Liberation from WHAT? From WHITES? That can be the only answer... And if the ANC feels that way about Zimbabwe... then what exactly does that mean for us in S.Africa??? We're gonna be on the chopping block too... Our asses are gonna be kicked!!!

I noted that there seem to be hints coming from our socialist trash... that the "Right Wing" is behind a "Third Force" in Zimbabwe... What junk. The closest thing to a "Third Force" was me!!! And I failed miserably!! Mugabe's agents came to me, asking to "join the war"... and I had to admit that there was no war... (Sadly). The Black Zimbabweans often asked me about the "Rhodesian Arms Caches". They seemed to live under a mistaken belief that Whites had stashed away huge arms caches and now they wanted access to our guns... so they could wage war against Mugabe. There was much talk among the black Zimbabweans about the Rhodesian arms caches... which supposedly were hidden by whites on farms. I had to tell them... that no such thing existed. I have *NEVER* heard of any White Rhodesians who ever claimed or hinted at having stashed away arms. Instead, I know we were all forced to hand in our weapons at the end of the war. My own parents handed in our shotgun and hunting rifle - which could not by any stretch of the imagination be regarded as weapons of war.

No... The Whites don't have arms caches... anywhere in Southern Africa.

Regarding the "Third Force"...

For those who don't know... the ANC carried out violence in South Africa when De Klerk was around and they blamed it on a mysterious "Third Force" which the Afrikaners supposedly controlled. There never was such a thing. But they loved pretending it existed because then they, the ANC could murder blacks who did not support them and then blame it on the whites. I put forward my comments on this in my book: Govt by Deception. If they start talking about a "Third Force" in Zimbabwe... then it will no doubt be in an attempt at pretending that Whites in Africa are waging an armed struggle in Zim. IF ONLY IT WERE TRUE... I would be shouting it from the roof tops... But the sad reality is the opposite. It doesn't exist. As I mentioned last year... the ANC railroaded what little co-operation there was between myself and the blacks in Zim... and I never EVER heard of anything else which suggested that anything real actually existed. There was only one white person walking around calling for armed conflict - and that was me. I will admit it - It would be great if I had my own army... but sadly I have none! The only "army" is me... and the deadliest weapon I have is my website!! That, I'm afraid, is the sad, miserable, rotten truth about my state of affairs. I would gladly die in front of Mugabe or Mbeki's firing squad... if I had a real army. Hey... I'd like to at least die for a reason. But damn it... to be innocent... and to have no resources - that sucks!!! Jan]

News Alert: S.Africa: Racist Blood Furore: Unprecedented Blood crisis looming?:

12 March 2005

Something quite interesting happened to me today, and I have been digging into it. I think a *BIG* story might yet come out of this one.

Some weeks ago, I put out stories about the furore caused by some moron over the fact that "White blood" was regarded as safer than "Black blood". Immediately... the Government, indeed the Minister of Health no less... seized upon this "racism" and swore to immediately put a stop to it.

Of course... this classification of blood is merely the result of statistics which have shown for years that AIDS is much more prevalent among blacks than whites and therefore... it was quite simple and logical to take "ethnicity" into account when deciding which blood was likely to be safer.

I said back then, that I am willing to bet that the "non-racist" approach will be: (a) More costly (b) Less effective, and that the upshot is likely to be an increase in the transmission of HIV via blood transfusions.

Today something interesting happened to me... which might indicate that something even bigger... and much more devastating might come of this...

The last news reports I heard said that the Government had been discussing the matter with the South African Blood Service and they have come up with a "new model" which was non-racist and which would ensure a safe blood supply.

Today, I might have had my first glimpse at this "new non-racist" model.

I went off to donate blood this morning... as I am a regular blood donor. I normally donate blood on Saturday mornings, so this morning was a bit out of the ordinary. When I got there, at 9:40am I noticed that nobody was donating blood. That struck me as strange because normally on a Saturday morning at least 3 or more people would already be lying on the beds. But today was Friday... so I thought: Maybe it is just quieter in the week?

I went and filled out the laborious 2 page questionnaire which included questions about my medical history and also questions about sexual behaviour.

Sadly, in recent years, the blood service has been changing their staff a lot at the branch where I donate. All the whites are gone, and I've seen a number of non-white staff come and go. So unfortunately, I don't know the staff there - like I used to. I was on very good terms with the nursing sisters and staff there in the past.

I noticed an Indian nursing sister and a black woman at the computer. I had never seen either of these two before.

So I handed in my form, and was waiting for the Indian woman to prick my finger to test my iron levels. They also have, as part of their procedure, a short question and answer session - an "Interview" as they call it. Normally, they just casually fire 3 questions at you along the lines of: "Do you consider your blood to be safe for transfusion to patients... and did you answer the questions correctly/honestly..." Its normally quite amiable and one hardly notices it.

But today, I noticed a change. The Indian nursing sister was very pushy and remanded me on not filling in all my details, including my address, etc in full. I told her that in the past, during my 16 years of donating blood, that the staff were friendly and had said I did not need to fill in all those questions each time since it was on the computer. So she said to me that the rules had now changed. Ok... cool...

Then she fired off a bunch of questions at me which caught me completely off guard and totally floored me.

It began like this:-

"Are you single?"

"Yes"

"Do you have a regular sex partner?"

I answered...

She asked some other question about my personal sex life...

I answered...

"Have you changed your sex partner recently?"

"What has this got to do with you?"

Then she looked at me and said: "If you fail to answer the interview questions, you cannot donate blood!"

I looked at this cheeky, pushy woman, and in an instant RAGE, I slammed both my hands down on the table with such a force and noise that both of the women jumped in fright... and I said to her calmly: "You have now lost a blood donor!"... and I walked right out the door.

Let me return to the question-and-answer session. I was absolutely floored at the personal, intimate questions asked about my sex life. Not only that, but this is not done privately. You are sitting in an open room, and everyone present can hear her questions and my answers. If other donors had been lying there... they would have heard these highly personal and intimate questions and answers! Never in my life, have I even had my own doctor ask me such deeply personal questions.

Later in the day, still seething with rage, I thought about this, and thought: But hold on... I'm pretty sure that hardly any of the other donors will put up with this... and could this be why nobody was donating blood this morning?

Let me digress and paint a picture for you which is 100% real about blood donations in South Africa. I remember from past discussions with nursing sisters in the blood transfusion service, that there are approximately 250,000 regular blood donors in South Africa, who service 44 million people. In South Africa you don't get paid for your blood. Blood donors here do it for free - and there is this small cadre of people who pride themselves on carrying out this "civic duty". Nobody forces them. They are self-motivated and do this with amazing regularity. In any other country, they would be regarded as model citizens.

Furthermore, I have donated blood for at least about 16 years - regularly. My sister has donated for about 20 years non-stop and a good friend of mine for 35 years - non-stop. In fact, he has donated about 200 pints of blood - which puts him in a very small group of people.

Even though many non-whites have moved into our suburbs over the years, I have only once seen a black man donate blood and only once seen a coloured man donate blood. All the other times I have seen only whites donating blood. My sister tells the same story. In the town where she lives, she says she has NEVER seen a non-white person donating blood.

Judging by the comments I have heard from nursing sisters in the past, about the problems they had with donations by blacks and by my own observations when donating blood - I would guess - that at least 90% of the blood donated in South Africa - comes from WHITES!! My nephew tells me he's heard blacks saying that they refuse to donate blood unless they are paid for it. In South Africa you don't get paid to donate blood - period. I am quite convinced that the vast mass of blood in this country comes almost exclusively from whites - yet, most of those receiving it, must be blacks (since they make up the majority of the population).

My mother mentioned to some friends of hers my experience. Her friends, an old couple, turned around and told her, that they were also asked these invasive sexual questions and they immediately stopped donating blood. They said they would not put up with this invasion of their lives since they were carrying out a free service and did not have to put up with this kind of attitude.

Unfortunately, my sister has not donated blood recently, and my friend with 200 donations is on "strike" - because he is busy having an argument with the blood service about his 200 donations... So I can't confirm whether this procedure is indeed being carried out everywhere with the ruthlessness which I experienced it. Though... the story of the old couple seems to confirm that this is indeed happening elsewhere.

I will take a peek tomorrow (saturday), to see if they are as busy as they used to be on Saturdays... or not...

Here is what I suspect: It seems to me, this most intrusive interview process may be the result of the new "non-racist model" the moronic Minister of Health was crowing about. If so... I wonder how many White donors have been completely alienated by this ridiculous process... Furthermore, as my sister also says: Do these stupid questions, asked verbally, prove anything? Does it make blood any safer? How do you know the respondent isn't lying? I could have lied if I wanted to... and they would not have known any better...

But I am wondering... if this new procedure is perhaps driving away... thousands of the "core donors?"

Due to AIDs, etc... South Africa is constantly on the edge... and experiencing blood shortages. At times like now, with Easter coming up, and many people going on holiday... there are lots of accidents and they are constantly calling upon citizens to donate blood. I am wondering... if we won't see a most unprecedented shortage of blood... on a scale never before seen in this country?

I will dig around... I have asked those I know... to ask around and to let me know.

One friend of mine knows someone high up in the blood service and said he will pass my story on to her.

I am seething with anger. I already want to write to the blood service to tell them the following:-

"You people are BEGGARS. We don't get paid for this. We do this at our own cost and inconvenience. If your staff are going to cop an attitude then I want to say to you: STUFF YOU!! You've lost a donor... and I hope you lose many thousands more!!"

This also set me thinking about why I'm donating. Chances are... that 70-90% of the blood I'm donating is saving the life of some black person... and I'm asking myself: Do I really want to be responsible for saving their lives? Maybe... I don't want to...?

And this brings me back to the "racist blood" furore... I hope that with their cheek and arrogance, at refusing to recognise a selfless contribution by White people... that lots and lots of whites stop donating blood. (Wouldn't it be cool if someone could organise a "racist campaign" to ask whites not to donate blood any more?)... Thousands of people (the vast majority being black), would DIE! And I'd love to see them scrambling around... among a black population that is infected up to its eyeballs in HIV... trying to find blood which can be used. You may find that they will need to get 5 or 6 times as much blood... than before, since most of it will be unusable. It would totally decimate the blood service... But you know what... it would serve them right!

I would love to see them forking out money, buying blood from outside Africa... trying to make up for what they got for FREE previously!!

I'm going to watch this development... because this might just be a huge disaster that was created by arrogant blacks who cannot accept the realities of life and work accordingly. Thanks to the mean-spirited manner in which they seek out any inane thing which can be used as an "example of racism"... I hope they suffer accordingly.

As for me - I will make a point of never donating another pint of blood again.

Finally, I must mention this important point: Many of you have read or heard President Mbeki's completely moronic statements in the international media (which had the Wall Street Journal actually questioning his SANITY!)... wherein he said that HIV and AIDS are not related... He goes on about the link to poverty (as opposed to SEX), etc, etc... trying to blame AIDS on whites, etc...

Well, the SANBS (SA National Blood Service), obviously does not prescribe to the Crazy President's theory... because the standard questionnaire has always asked questions about your sexual behaviour... and the "new model" as I have mentioned is totally invasive... and focusses on SEX, SEX and more SEX!!!!

Now if the Crazy President's insane propaganda had any practical value... then maybe the sex questions should be dropped and replaced with questions like this: "What is your annual income?"... because then, if you are poor... we'd know you are most likely to be HIV+!!! ... Are you "previously disadvantaged?"...

The joke is... if you asked such questions... Whites would still come out as being the ones with the safest blood!!!

Let me stop... I am engulfed by the madness of it all... Is this a crazy country or what?

News Alert: S.Africa: 12-year-old Coloured girl tortured to death:

14 March 2005

[Eldorado Park is a predominantly coloured area, and judging by the names, the accused and the victim are coloured. News headlines in other newspapers state that the 12-year-old was tortured to death.

Violence just keeps getting worse... because criminals have nothing to fear. Note how angry the coloured people in this area are. On my website I cannot even begin to document how many children are murdered in South Africa daily. I can only pick out the worst incidents that come up in the news. This agreement, which has been written about many times - but which people now have forgotten - stated that after "Liberation", the SA Communist Party would lead the transformation of South Africa into... "socialism" (which really means communism).

All this "Land Reform" nonsense is really NATIONALISATION of the Land and the undermining of the Right to own property.

The trouble-making communists have been pushing quite hard in recent months on this land reform issue, and have been attacking White farmers verbally more than ever.

Who knows what this could lead to in the years to come... another Zimbabwe? Jan]

News Alert: S.Africa: The Big AIDS coverup:

15 March 2005

This evening on E-TV news they had a story from the Medical Research Council stating that AIDS was far worse than Stats SA had led everyone to believe. Stats SA is, to my knowledge, the Government statistics dept. It has appeared to me for many years that Govt. statistics here are fudged.

The Medical Research Council came out with a report stating that the Stats SA figures were completely wrong and that AIDS deaths were the leading cause of death in South Africa. Stats SA had said that AIDS was only the 11th most serious cause of death in S.Africa!!

There was film footage of a black Professor at MRC who was putting out this info. The professor stated that AIDS was wiping out people in the age group 20-30. He said that AIDS was probably one of the worst crises this country has ever had to face.

For years Jeff Rense and I have been discussing this very fact. In the past I put on my website the detailed analysis by Dr Jan Du Plessis wherein he said that AIDS would change the face of South Africa completely.

Sadly, I cannot find a news report on any of the major Africa news websites which mention the report by the Medical Research Council. Maybe something will be available tomorrow...

News Alert: S.Africa: Black man caught having sex with calf:

CHINA, RUSSIA TO 'REHEARSE INVASION OF TAIWAN':

17 March 2005

[I find it interesting how closely the Russians and Chinese are co-operating in the Middle East... and now over Taiwan... It was announced in South Africa that: (a) to the chagrin of the USA, South Africa will be strengthening ties with Communist North Korea! (b) The South African Communist Party is considering coming out into the open... to openly state their communist views on where South Africa should be going. I wrote about exactly this event in my book, Government by Deception. Jan]

S.African Communist Party to come out from behind the ANC?:

17 March 2005

Here is another news story that I'm battling to find a link to on the Internet.

It was stated in many TV news reports and also in various newspapers (I have copy of it in THE CITIZEN), that the South African Communist Party is thinking about coming out from "behind the ANC" to register as a Political party to contest elections openly - instead of letting their candidates go in on the ANC ticket.

The news reports were open... about the ANC/SACP links... and how they work together.

The SACP said it is THINKING about registering as a political party and contesting future South African elections on its own.

Now this is a most interesting development because I wrote about this in my book, Government by Deception. I wrote about a discussion the late Joe Slovo had with someone I know. Joe Slovo was a "White communist" - the White man, who had the rank of Colonel in the KGB, who pretty much ran much of the "Liberation" of Africa. Slovo was later given a post by the ANC as Minister of Housing before he died of cancer.

In my book, I recorded a story told to me by someone who met Slovo during our "peace talks" before the Whites handed over power to the ANC. My informant told me he met Slovo during a lunch break and asked him what the SACP would do if the ANC ever tried to split away from them. Slovo's answer was that the blacks of South Africa had bought into socialism (communism) and if this ever happened, the SACP would register as a political party and would contest elections because it believed it could beat the ANC. The SACP was convinced that if the ANC did not take black South Africans towards socialism... then it could do the job alone.

I don't think that exact scenario is playing out here... yet I find it interesting that the SACP is thinking of coming out into the open.

The SACP has said that they think the time has come for most Communist voices to be heard more openly in South African society!!!

I note with interest too... that the South African Govt. has drawn a lot closer to Communist North Korea... and apparently this has ticked off the USA.

I am curious to see if the SACP is going to register as a political party. I suspect all this is really about SPEEDING UP THE PROCESS OF SOCIALISM IN SOUTH AFRICA...

Remember... The Whites warned everyone about this for decades... and people outside South Africa thought we were making all this up.

Communism... is alive and well in South Africa.

Johannesburg: 775 power outages in 8 months...:

The story can be found at this link:

Online Poll: 87% say Zimbabwe elections will NOT be fair:

18 March 2005

I took part in an online poll of South Africans at IOL. The question was: Do you think the Zimbabwe elections can be free and fair?

At the time I took part in it, the results were:-

This chart is generated every five minutes and percentages may not match actual number of votes.

87% = No, the events leading up the poll speak for themselves. (302 votes)

4% = Yes, because the whole world's watching. (15 votes)

9% = It is difficult to judge before the election has even started. (30 votes)

Independent Online is a South African website so presumably these are the results mainly from South Africans... and it shows how most of us view Mugabe... for being the scum that he is. Jan

Uganda: Women's lips, ears and breasts hacked off...:

22 March 2005

[I am sure many people outside Africa never believed me when I said that Robert Mugabe's people cut black people's lips off... And I have photos of that on my website. In Angola... blacks cut white women's breasts off... while they were alive... and in one case... put live white people through a saw at a timber mill. It sounds cruel eh? And I'll bet many Americans think I am making it all up. But... here is a news report showing these things happening right now... in Uganda. Jan]

Mandela: I cannot rest while Aids ravages SA:

22 March 2005

[These days Mandela talks openly about the damage AIDS is doing. AIDS is SLAUGHTERING blacks across Africa in a way that has never been seen in recorded history. Words can hardly describe what AIDS is doing in Africa.

Of course, Mandela is nothing, if he does not remind us that he was a prisoner. His only claim to fame is being a terrorist who spent 27 years in jail. Beyond that... he is nothing but a propaganda creation... no intellect... nothing...

And what would he be without Apartheid? They need Apartheid... and love it... because it is the only thing that gives them meaning in life. If it were not for Apartheid what would they do? Who would they be? Nothing! Why? Because they're a talentless bunch of losers...

So... Now they have launched a concert... where international rock stars will participate (again)... in raising money... and they even have a website for it: www.46664.com. Why? Because that's Mandela's prison number... when he was on Robben Island (or so they claim). Jan]

Namibias New President: Whites must hand over land or face Revolution:

22 March 2005

[I heard on a news report that the new President of Namibia, who no doubt will continue with the socialism of started by Nujoma, said that Whites must start handing over land to the blacks or else they would face a Revolution.

It appears to me, that Namibia and South Africa are entering "Phase two" of the "Black Liberation" struggle... In this phase... Marxism comes into play... A friend of mine, who went to school with me, remarked the other

day: "The blacks are patient". He was referring to how long they are willing to wait before springing their next move on us...

Of course... the "Revolution" they hint at... and suggest will be a "spontaneous uprising by poverty-stricken blacks"... is really a smoke screen. The reality, as we saw in Zimbabwe was that it is a Government-initiated project... which involves black soldiers and officers going out and stirring up the masses and transporting them in army trucks... S.Africa: Several tons of weapons found in cache in Natal:

22 March 2005

[It appears the weapons are old... therefore... the arms cache may be a Zulu arms cache from weapons given to them by the White Govt to defend themselves from the ANC in the days prior to handing over power to the ANC. There was a fierce and highly secretive war between the Zulus and ANC prior to 1994... the exact extent of that war, and the deaths is shrouded in secrecy. The Whites armed the Zulus who were against the ANC and their Socialism... and the two sides really let each other have it. I have read of one instance of fighting where 2,000 blacks died. Exactly how many people died... is a mystery... but there was a war within a war raging there for years, and even now, on odd occasions, there are still assassinations and family murders perpetrated by one side or the other. The Zulus had, and still have a deep hatred of the Xhosas. Mandela is a Xhosa, and many Zulus hate the idea of South Africa being ruled largely by Xhosas. Jan]

S.Africa: Officials deny renaming is Reverse Racism:

22 March 2005

[Listen to me... All these denials by the blacks about racism is RUBBISH! They claim they are non-racist and are fighting racism in all its forms... It is inevitable that the two cannot co-exist side by side. The Blacks *WILL* engage in their push for Black Nationalism and they will shove everyone else aside in the move. All these denials... are complete nonsense. Wait and see... Jan]

S.Africa: Two cops hijacked, one killed

22 March 2005

[Even the Police aren't safe any more!!! Ah! Don't forget... President Mbeki (that great stand-up comedian) said a few weeks back that crime was going down... Yeah right...

Let me digress into a bit of South African history: Interestingly, Tweefontein, where this crime occurred is the site of quite an amazing guerilla raid during the Boer war a century ago which I was recently reading about. At Tweefontein, General De Wet launched an attack on a British camp on a hill and soundly whipped them. There was a British army of 20,000 in the vicinity of Tweefontein while the Boer General, De Wet, had only about 600-700 men. De Wet decided to try attacking the British! So he singled out one of their camps for a night attack. The British were encamped on a hill and had built entrenchments all around it. The Boers climbed up the steepest side of the hill in the night when the British least expected it. 500 Boers attacked 400 British and shot them to bits. The Boers lost 44 men, and the British 116. The Boers captured their guns and many other things and made off with them.

Interestingly, one of the British survivors of the attack told that the Boers were so impoverished that a number of them even wore women's clothing because they had no other clothes to wear. Prior to this... the British had sent 60,000 troops in a broad sweep to try to capture De Wet... but De Wet and his men slipped through the British lines...

Sadly... South Africa is no longer a preside of gallantry and great deeds... but a nation of losers and filth... where criminal scum get to kill anyone in any way that they please - even the Police!!

The Racist Conspiracy against Michael Jackson and Prominent Blacks:

24 March 2005

[Here we go... the racist excuse again... I couldn't help noticing Michael Jackson bringing up Nelson Mandela's name... the old black communist terrorist... who went to jail for MURDERING PEOPLE and for plotting to unleash 7,000 terrorists across South Africa. Hmmm... what CONSPIRACY was there against Mandela? None... He and a bunch of other blacks and whites were found guilty of terrorism and murder... caught red-handed with lots of evidence of their terrorist activities along with plans of new activities. What's the conspiracy? The old bugger was put in jail for good reason... and in fact, is lucky he was not executed, as he deserved to be, for what he was doing.

It appears to me, Michael Jackson is playing a lot of games trying to get public sympathy. This whole business of "flu" and how he fell and hurt himself and coughed up blood... all these things conveniently caused the trial to be brought to a halt. I think Jackson is just good at playing the public sympathy card. His PR is good.

Funny that he does not mention O.J. Simpson who got away with blatant murder just because he was a Black American hero. Or doesn't that count?

And where were the White "conspiracies" when Michael Jackson, O.J., Mandela and all the others were raking in money by the millions? The only time they cry "conspiracy" is when things are going wrong for them... especially... in these cases when they are charged with crimes... not crimes which Whites committed against them... but crimes which they committed against (mainly) White people? Why is S.Africa continually refusing US Aircraft carriers to berth here?:

29 March 2005

[Here is something very interesting indeed... A long time ago, I put stories on my website about South Africa wrangling about "nuclear powered US Navy ships" not being allowed into South African harbours - specifically Cape Town harbour. This has happened before... where the South African Govt has turned a US Aircraft carrier away from Cape Town. In this case, an entire carrier battle-group were turned away.

Now what is interesting is the lame excuse... the lame methods used... to pretend that the "documentation" was not sorted out in time... But... if I look at this... it bears a similar pattern to the way the blacks deal with us. They cover up FIRM INTENT by pretending that it was merely a "mistake" or a "slip up"... How on earth... can a Govt not process the documentation for a nuclear carrier group...? How can a Govt clerk simply ignore it? No! I am quite certain, this is a DEFINITE SNUB... a REAL THING...

The blacks may cover this up, by being all friendly... and making all sorts of pleasant noises and excuses... but the fact is... I am quite sure this is a definite, determined act. Furthermore... this is not the first time... the S.African Govt has refused to let a US Aircraft carrier into a harbour... and that makes it smell even more.

I think, that at a high level... a decision has been taken... by our Govt to stop US Navy ships come into port... (or at least the aircraft carriers)... and our Govt is firmly determined not to let this happen... But they are hiding this fact by using diplomatic language, etc.

The news report below mentions what we are losing... simply by refusing US sailors to come on to our soil. Jan]

DebkaFile: Zimbabwe Hell in Paradise:

29 March 2005

[This is most appropriate, when discussing Zimbabwe... Hell in Paradise. But to a lesser degree, it is also true of all of Africa: Hell in Paradise. God gave them Paradise... BUT THEY TURNED IT INTO HELL.

Note, in the article below, the growth rate of Zimbabwe, when Mugabe inherited it: 4.5% in 1980 - at the end of a war. Yet, even a few years before that... in 1975... at the height of sanctions and war... Rhodesia had a stunning growth rate of 10% - equal to that of the Asian Tigers. The Black Titanic: A Lesson Whites can learn from Mugabe...:

29 March 2005

This evening I was watching E-Tv and saw some election coverage showing Mugabe at a rally in Manicaland. Mugabe was ranting and raving about Britain and ... never having colonialism again... blah... Then he said: "We have a RIGHT to choose our own future..." He said that this was recognised at the UN.

Then I thought to myself: Ok, so you arrogant Blacks have a RIGHT to choose your own future. Cool. I'm not going to dispute that. But if you Blacks have a right to choose your own future, then what stops us Whites from choosing ours? Why can Blacks choose their own future, but we can't?

We used to be the top dogs ruling them but now things have changed and they rule us. We used to be free... and they were not free. But now they are free, and we are not. However, we could be free too.

I thought: If they can choose whatever rotten loser future they want for themselves, then what stops us from choosing a better future for ourselves - WITHOUT THEM?

So, let the Blacks do whatever they believe is in their national interest, while we could do whatever is in our national interest. That would be fair would it not?

I don't believe that the Blacks actually have a place for us in their plans - except to milk what they can from us, until we are empty, and then they can kick us aside, having stolen from us whatever it is they wanted. I never believed in the "future for all". I don't believe, at their higher levels that they are interested in that. They have argued, for a long time that they really are Black Nationalists. That being the case... I can't see how Black Nationalism and Whites can co-exist. If their real agenda is Black Nationalism (which I believe it is), then it can only be at our expense.

Black Nationalism and White Nationalism obviously cannot co-exist. At some point, there must be a parting of ways.

I never used to be a White Nationalist, but in recent years I have changed a lot and realised that for us this is the only way forward. But... the path of White Nationalism... can only be an extremely bloody exercise. Black Nationalists would not tolerate one iota of White Nationalism for more than a second without attempting to beat it to death with every ounce of energy they have.

Going back to Mugabe's speech, it made me think, that for us, there really is no option but to look out for our own self interest. The Blacks are having a lot of fun, accumulating power, stealing money, and finding 101 different ways of making us poorer, while strengthening their own hand. They're working day and night towards strengthening their position at our expense. If we had any brains... we would do the same.

We cannot rely on them to safeguard our interests. They have shown that they can't be trusted. We must look after our interests. Anyway, its foolish of us to even think that we should let anyone else look out for us.

To a degree, I actually admire Mugabe. Really. I may hate him with a passion. I hate him more than I hate the ANC. Yet, I have a respect for Mugabe that I don't have for the ANC. I respect the fact that Mugabe calls it the way he sees it. However, I believe, we should also have a right to say our say and voice our opinion the way he does.

In my view... a parting of company between the Black and White races should come about in Africa. Maybe it won't happen in my lifetime. But I think the sooner that day comes, the better. Make no mistake - such an event would be accompanied by hardships the likes of which we have never seen before. Yet, I'm not adverse to strife if there is a good reason for it. Strife is also good. Strife toughens people. That which does not kill you makes you stronger. I tend to believe in a "passion" for life. I feel, one must not live life by half-measures. If one believes in something truly, and if that thing has value, then one should not hesitate to put one's life on the line in defence of that principle. Of what use are values and beliefs and knowledge if one is too much of a coward to stand up for the things one believes in.

To a degree I admire Mugabe. I admire the fact that he says what he wants to say. But I also think, he shouldn't have the stage all to himself. He should be opposed by people who are equally impassioned who are willing to stand up to the likes of him... and the ANC too.

I admire that he says Blacks can choose their future. I just feel, that the future they want to map out is a loser future. I believe that the values Black Africans have adopted are completely unrealistic and insane. I think Whites should not just sit back and let Blacks dictate our future for us. We also have a right to determine our future. And if we believe the Blacks are intent on suicide, then I can't see how the Lord God himself, could blame us for deciding that we do not want to die alongside the Blacks - or have the Blacks run us into the ground before they die themselves. I don't believe in suicide. I don't believe we should end up on a road to hell just because that is the whim of the Blacks. If the Blacks want to choose socialism and communism and Black Nationalist suicide - then let them have it. I have always felt, I don't want to share their fate. If they want to do the stupid thing - let them - but I REBEL at the thought of being a part of it.

If Blacks have a right to Freedom, and a right to choose their path in life - then SO DO WE!! And if it means that one day we must part company with them... then I hope we do. I hope we have the courage to choose our own path one day... before we end up dead along with them.

If the Blacks want to experiment and fail... Let them do it. If they are blind, or so arrogant that they cannot see their own faults, then let them at it. I just don't want to be part of a stupid Black social experiment. In my view, there is more than enough historical evidence to prove that their methods are completely flawed and they will fail. Even as Mugabe talks about this freedom... and this ability to choose their future... he is presiding over a country whose GDP has collapsed to a mere fraction of what it was a mere 5 years ago. Even as he arrogantly speaks these words, he has in his lifetime totally undone decades worth of progress in a mere handful of years. If he is too arrogant to see the error of his ways... then fine. But for those of us with the brains to see what awaits us if we follow these crazy, arrogant blacks - I think we should all be thinking in terms of jumping out of this Black Titanic which we are sailing on.

We can see the iceberg. The Blacks in their extreme arrogance choose to ignore our sane advice. I don't see the point of being a casualty of their insanity.

If Blacks have the right to sail forward into the iceberg... then we have a right to jump into the life rafts and survive. I can't see how either God or history will blame us for trying to save ourselves. On the contrary, I think history would judge us to be complete fools if we did not take sane actions to protect ourselves to avert our own destruction. Let God and history pronounce Blacks as not fit enough to live. Let them kill themselves by their own hand. We can outlive them and do so much better without them anyway.

The less we concern ourselves with their stupid problems the better. They are still trying to solve problems which Whites and Asians solved thousands of years ago. Why are we stunting our own intellectual, material and spiritual growth because of them? We should be reaching for the stars... while the Blacks are still trying to figure out how to grow food!!! We're just not on the same level as them. They will forever be a drag. If we were to relieve ourselves of the Black burden we can think only of ourselves and move forward and progress, as our forefathers did. The Blacks aren't interested in progress alongside us... so let them try their loser experiments. We should instead concern ourselves with proven methods which work... and move forward on that basis.

Mugabe is right when he says that Blacks have a right to do things their way. But, we also have the God-given right to do things our way.

Many people fear strife and dissent. But my belief is that one should not fear these things. If the reason for strife is based on sound thinking and logic, then I believe one should move forward. One should not let fear and cowardice cause oneself to steer away from logical action.

Strife separates the men from the boys. Strife makes people stronger. Strife is a necessary part of life. I do not believe that everyone can be happy all the time. I believe that because Blacks and Whites are not on the same intellectual and emotional levels that strife between us is actually natural and unavoidable. We must not feel guilty about this. We should just accept this as fact, and move forward, knowing full well, that it will irritate them extremely and bring the full force of their ferocity down upon us. But so what? Of what value is life and values if one is not willing to stand up for the things one believes in?

I'm sorry... but in my daily life I don't walk around kissing people's backsides just to make them happy. I have plenty of fights with people and I have often seen that a good bit of anger can bring benefits. If one lets others walk all over you, then they will try to dominate you. They will not respect you because you are weak. The same applies at a racial and political level. If we just cower in a corner and let Blacks kick us around as and how it takes their fancy then they will not respect us. (In fact, I am quite certain they have already lost their respect for us). Maybe what some of these Blacks need is a good punch in the mouth. Then they will respect us more as well.

All this butt-kissing isn't good for us and you know what - its not good for them either. The Liberals of the planet are turning Blacks into spoiled brats who don't have any boundaries or limits. Butt-kissing will only make this worse... until it eventually becomes completely intolerable.

I believe that the more we leave Blacks to do as they please with us, the worse things will get for us. If we leave them, they will hammer us into the ground.

We must not forget that we have a right to exist, a right to life and a right to choose our own path. We must not feel guilty about deciding to choose a path which is totally contrary to theirs. Nor must we cringe at the conflict such a choice would bring.

Remember: We have as much right to life and liberty as they have.

Proof that Blacks are completely useless farmers:

29 March 2005

The other day I was browsing through an American reference publication: The World Almanac (2004).

While browsing through it, I was struck by some data which is incontrovertible proof that Black Africans are completely useless when it comes to agriculture.

The World Almanac has lots of data, per country. It contains a lot of economic and demographic information. I was fascinated by a breakdown of employment in different countries by sector. It showed the percentage of people involved in: Agriculture, Industry and Services.

What I found interesting was that in developed countries the number of people involved in agriculture is somewhere in the order of 2% of the population. Yet, in Black Africa... the percentage is staggering. It is 70% or 80% in most Black African nations.

Now consider this: A country like the USA, where only 2% of the population is involved in Agriculture is able not only to feed itself, but it also has surplusses which it can export. Yet, in much of Black Africa 70% of the population is engaged in (subsistence) Agriculture and yet, they do not have surplusses, and in many cases still cannot feed themselves.

This is not due to Africa's infertility because Africa is unique among the continents in having more land area at the equator or close to the equator than any other. Africa has longer seasons, more rain and far more heat than any other continent on the planet. Africa is the perfect Garden of Eden! Note: 99.9% of Africa never experiences snow!!! Yet, countries like Canada or even Russia, with short growing seasons are able to produce food surpluses.

I have heard arrogant Black South African politicians claiming that Blacks can farm just as well as Whites - but in reality, they're talking a lot of rubbish. Their primitive Stone-age methods don't even come close to comparing with the methods introduced by White people here. Few of them are capable of matching the excellence of White farmers who are experienced businessmen with lots of technical knowledge about modern farming methods.

White African farmers are proof that modern methods totally outclass ancient wasteful methods.

I found it interesting to look at these economic statistics which so clearly showed how useless and wasteful Africa really is. Much of the population is engaged in work which brings so few results.

Now interestingly, the way Zimbabwe (and shortly Namibia and South Africa) are going about things, they are actually forcing more and more Blacks into agriculture... But... the Blacks do not have our knowledge, experience or capital. So the irony of the situation is this: The more Blacks are forced away from normal employment into becoming "peasants"... the less food they will have!! And all of Africa is proof that this is so!!

If you don't believe me... just make a trip to your nearest reference library and study some statistics.

New Documents: 1981 attack on Pope planned by the KGB:

29 March 2005

[This does not surprise me at all. There used to be a saying that a Rhodesian sees a communist behind every bush. A Colonel in the South African Defence Force once said this to me: "I used to believe there was a communist behind every bush. But now I know I was wrong. In fact... there were two!! I am quite convinced that when the history of our time is rewritten one day... that people will be shocked to find how many times Communists meddled in all manner of matters in order to try to fool people into taking the wrong course of action.

Take special note of the mention of a whole operation to cover things up afterwards... and keep this sort of thing in mind when you see the modern leftists REWRITING HISTORY AROUND THE WORLD. A simple recent example is the Weapons of Mass Destruction in Iraq. The evidence was there... but gradually... as time goes by... the evidence, facts, etc quietly change... and now people doubt their own minds.

Here in Africa, the Black Communists like to rewrite history whenever they get a chance. And they do... in bits and pieces... Jan]

S.African Communist Party: Zim poll seriously flawed:

31 March 2005

[It is quite amazing to see how the Communists are playing both sides of the fence in Zimbabwe. The ANC Govt in South Africa is standing 100% behind Mugabe, while the SACP and COSATU (Trade Unions) are now courting the opposition. Either way, I think the game is to ensure that no matter which way Zimbabwe goes... blacks on all sides will be kept within the Marxist orbit. Jan]

Zimbabwe's Ghost Voters:

31 March 2005

[Mugabe "predicts" a huge election victory. In Zimbabwe they speak cynically about the "dead never voting for the opposition!"... since so many dead people are "taking part" in the elections!!

This reminds me of something a buddy of mine said some years ago. He said to me which went something along these lines: "Damn, the blacks are clever... They pretend to have democracy... but they count the votes any way they want to... Now why didn't we have the brains to think of that? We could also have "given them freedom"... but at election time... we could count the votes in whatever way suits us!!" I agree... We are idiots. Jan]

S. African unionists protest at Zimbabwe border:

31 March 2005

[Its amazing how South Africa's Communists are playing both sides of the game. They are really behind Mugabe (thanks to the ANC), but COSATU and the Communist Youths are also courting Mugabe's opposition. Of one thing we can be sure: Zimbabwe will not be allowed to leave the Socialist orbit... Jan]

S.Africa: Soweto survey on condom usage and sexual violence:

31 March 2005

[All these surveys in South Africa about AIDS are quite funny when one compares them with President Mbeki's crazy statements. Clearly nobody in the Medical Industry, nor in the scientific world gives a hoot about Mbeki's statements that AIDS is not a sexually transmitted disease. But when Mbeki speaks to the world he says such crazy things. He sure can lie with a straight face. Jan]

S.Africa: 30,000 strikers bring Gold mines to a standstill:

31 March 2005

[We always have strikes. Blacks are never happy with anything - even when they are in charge. But then again... maybe striking is just a fun way to not have to work. Interestingly... it is almost unknown for Whites to strike here. I have seen a few Whites striking in recent years simply because they have to do the same as the Blacks. But generally speaking... White people here NEVER go on strike... they go to work day after day... to earn that money to pay the majority of tax in this country. It has always been the practise in South Africa that when Blacks go on strike, the Whites do their work as best they can. I once worked for a medical company where the Blacks loved striking. When they went on strike, the Whites would do the deliveries of the crucial medicines, etc. Lately, I watch Blacks and think to myself: These people are not fit to live. Jan]

S.Africa: Mbeki stands by 'free and fair' election despite global criticism:

31 March 2005

[Our psychic President has known since before the election that it would be free and fair despite all the violence reported there. South African observers refuse to speak to the media - on orders from Mbeki no doubt. Foreign observers have said the election is rigged... but only Mbeki disagrees.

This should really send chills down our spines in South Africa, because if Mbeki stands so firmly behind one of the most evil men in the world... it may yet be a sign of what faces us. Mbeki disregards the truth when it suits him. He and his cabinet can be deaf, blind and dumb just when they like. They turn a blind eye to Mugabe, or the murder of White Farmers... as the mood takes them. We are crazy to think Mbeki can be trusted with caring for our interests. I believe he is just waiting for the moment when it best suits him to stab us in the back - again.

To me it merely confirms my long-held observations and beliefs that Blacks merely use the word "democracy" because it makes them acceptable to the world, but in reality they don't care two hoots about democracy, constitutions, their citizens, etc... Jan]

British Journalists arrested in Zimbabwe:

31 March 2005

[Mugabe's concept of "freedom of speech", "democracy", etc is interesting huh? I saw an interview where he said in effect: "This is completely free and fair..." How funny. And Mbeki says the same. I just love the blatancy of the lies of our black leaders... Amazing... They lie with a straight face in the face of overwhelming facts to the contrary. Jan]

S.Africa: Disarming Whites: 30,000 guns handed in:

31 March 2005

[I heard this story from an old white lady I know who lives in Pretoria. She said that her husband's firearm license had expired, but hers had not. She said that the Police took her licensed firearm away from her... along with her husband's expired one!!!

What is also interesting about these handguns is that they have been purchased by the owners. So the Govt comes and takes away your firearm, which you paid for, and they don't give you a cent.

My mother reminded me of how we handed in our firearms in Zimbabwe. My brother took his military rifle and our shotgun and rifle and he broke it up and threw the bits away, piece by piece as he was driving along a rural road. He said he had no intention of giving it to the blacks. My mother threw all the bullets into a manhole.

But in South Africa, things are too controlled to be able to do that.

I'll bet that a good portion of the firearms which were handed in were ones which had been bought legally and had been licensed. But since the Police are issuing almost no more licences anymore... what's the bet that most of us will soon be handing in our handguns, etc simply

because we can't renew the licenses. I am waiting with interest to see what happens when my firearm licenses expire next year. Jan]

New book says Mbeki is a paranoid control freak:

31 March 2005

[This book is by an influential black guy in the ANC. Where I totally disagree though is with the assessment that Mugabe is cunning and he is outwitting Mbeki. That's complete bull. Mugabe is not outwitting Mbeki. Mbeki ADMIRES MUGABE and Mbeki is standing shoulder-to-shoulder with him despite flack from all across the world, including the USA. Mbeki is standing firm. People should not underestimate him. He is not a fool. He is just downright evil like Mugabe. Its that simple. Jan]

Zimbabwe Elections: Mugabe's Party has won...:

01 April 2005

[All the world can see it is a complete sham... and yet... the ANC dominated South African Government will stand by this as being "free and fair". It should send chills down the spines of all South Africans... because if this is what the ANC calls "free and fair"... then it shows what we're in for. Anyway... I'm sure there has been some messing with ballots here in South Africa. Even in 1994, President De Klerk openly admitted that the ANC stole 1 million votes. Who knows how much rigging goes on in our own elections?

Mugabe said he wants a bigger majority so that he can change the constitution (again). "Democracy" is whatever the hell Mugabe or Mbeki want it to be... Jan]

Ethiopia, Eritrea at verge of war, says UN official:

New hopes in Rwanda as rebels halt violence:

01 April 2005

[This is what I like about Black Africa. The South African Govt has intervned in Africa dozens of times in the last ten years, and has proclaimed "peace" and "negotiated settlement" in country after country... time and again... and the resultant "final peace" has been broken time and again and again. In my view... Blacks aren't fit to live. They can't live with Whites... and they can't live with themselves. They can't live with their own tribe. And another external tribe can't help them to make peace either. In fact... Blacks just keep on killing each other... and it never ends.

During the days when I tried to help the Black Zimbabweans, I got a bit of an insight into how blacks work with each other and there I got a glance at how blacks also can't work together. I noticed that virtually everyone was wheeling and dealing and trying to create their own power base.

Whites have problems with unity to be sure... but Blacks can be much worse. Blacks in Africa are never happy. The only time there was peace was when White men came here, made firm laws, and brought order among them, backing it up with force if need be. Much of Africa only experienced about 100 years of peace - and that was thanks to White Colonists. Prior to the Whites being here... and now also after the Whites have gone... THERE IS HARDLY A DAY'S WORTH OF PEACE IN MANY PARTS OF AFRICA. Jan]

Soviet Mugabe vows to bury opposition:

01 April 2005

[One of the Soviet leaders once made comment about the Western world saying: "We will bury you"...

Mbeki the absolute hypocrit: Respect the people's will:

01 April 2005

[This is too funny. Here is Mbeki talking about "respecting the will of the people" while at the same time standing firm in the face of overwhelming facts that the Zimbabwean election held yesterday, was completely rigged.

All these Black leaders speak about "democracy"... but its all a SHAM... a COMPLETE SHAM!!! It is ridiculous. Do these blacks actually believe in democracy? To be honest, I never really believed that they do... but they claim vociferously to be the champions of "democracy" and "freedom"... But if they can't deliver either democracy or freedom to their own black people then how much less hope is there for us Non-Blacks? I'll answer that: Zippo... NONE!!!

However, FOR THE RECORD... and this CAN BE FOUND IN THE HISTORICAL RECORDS OF AFRICA: Whites in Rhodesia, South Africa and South West Africa (Namibia)... DID STATE LONG AGO THAT THE BLACK "LIBERATORS" WERE IN REALITY DICTATORS WHO WERE NOT HERE TO FREE THE BLACKS. SO WHAT WE ARE SEEING HERE IS PROOF POSITIVE THAT *DECADES AGO* THE EARLIER GENERATIONS OF WHITES SAW CLEARLY THROUGH THIS SHAM... AND WHITES DECADES AGO SAW THE BLACK "LIBERATORS" FOR THE LOW-DOWN LYING SCUM THAT THEY HAVE PROVEN THEMSELVES TO BE. THE HISTORICAL RECORD WILL SHOW THAT WHITES HAVE BEEN TELLING THE TRUTH FOR DECADES.

As for Mbeki's comments - he normally talks rubbish - and it is no different on this occasion. He has never solved any problems, not inside South Africa and even less so outside of it. Note his ridiculous comments in support of yesterday's Zimbabwean election. Jan]

The Afrikaner's most deadly & bloody pursuit: Self-Rule:

03 April 2005

Over the years I have mentioned on odd occasions that a portion of Afrikanerdom (maybe 1/3rd of all Afrikaners?) have been trying to get their own White country for the last 20 years. Even though I mentioned it in passing, I never really concentrated on the idea, its practicality or its implications.

I must admit that I never fully grasped some of what this pursuit would involve.

In my book, Government by Deception, I did mention that I did not believe that we Afrikaners will get so much as 1 grain of sand from the (ANC) Blacks... ever! I mentioned how General Viljoen formed the Freedom Front and abandoned an Afrikaner Armed struggle in favour of trying to get the Afrikaner Country peacefully via negotiation. I mentioned how he resigned in frustration after 7 years in parliament. He even negotiated with Mandela, and eventually gave up in disgust and said so in a very moving speech in parliament when he finally walked out.

The Afrikaner pursuit for their own country continues to this day, and many Afrikaners intellectuals struggle with this idea constantly - including my good friend Dr Chris Jordaan.

I would like to make some comments of my own on this Afrikaner desire.

Firstly, the Afrikaner pursuit of self-rule is largely ignored in the mass media in South Africa. It hardly ever gets a mention, even though the Freedom Front is a political party with seats in parliament. The Freedom Front's express purpose for existing is solely to work towards an Afrikaner country. This is a "no no" type of subject in South Africa.

Secondly, Afrikaners mention the concept of "self-rule" in a very quiet way. They are all very quiet, very proper and very gentlemanly about the entire pursuit. Nobody gets all irritated. Nobody threatens the ANC. The whole subject really seems a lot like a game of cricket... all very gentlemanly and cultured - on both sides - both the Afrikaners and the Blacks.

Yet, underneath this veneer of culture, lies a subject that is exceedingly explosive. I would go so far as to say that NO IDEA or concept in South Africa is potentially as dangerous and explosive as the Afrikaner Homeland idea. Now that I have had my own experiences with Blacks in the political world, I am utterly convinced that the Afrikaner Homeland idea, if ever pursued seriously, would result in response from Blacks that is extremely violent and forceful. I don't believe that Mandela or any of the other Black leaders ever had anything but contempt for the idea. When Mandela negotiated with General Viljoen, I am certain he had no intention of giving General Viljoen one grain of sand, nor ANYTHING else. Indeed, as events proved, he strung General Viljoen along for 7 years and gave the Afrikaners nothing.

My understanding of the Afrikaner Homeland idea is that Afrikaners want a Homeland, inside South Africa, where they can rule themselves. They don't want to secede from South Africa. They want a White homeland (akin to the Black homelands - Bantustans - they once set up for the blacks). They just want autonomy within their own region. They don't want to live in a separate country from the Blacks... or at least that is not what they dare ask for openly.

So in short, the Afrikaner demands will not cause South Africa to be broken up. What they are asking is the equivalent of what they had already given the Blacks under Apartheid. Now that the

situation is completely reversed they are asking for a "White Bantustan". It is not an unreasonable demand.

Yet, the ANC will never give them so much as one grain of sand...

I think that there is no idea that gives the ANC the creeps like this Afrikaner Homeland idea. I also think that there is no idea the ANC will kick against like this one. I think the chance of Afrikaners getting anything... is... LESS THAN NOTHING!!! I believe, that if the Afrikaners were patient and negotiated with the ANC for a 100 years... that they will get absolutely nowhere.

What few people may realise is this: That the EU has a definition for what constitutes a NATION. Because so many different countries and nationalities exist within the EU, they developed a definition of what exactly is a "nation". Among the points in this definition are the following:-

1. A valid historical claim to land which they once ruled.
2. A unique language of their own.
3. A culture of their own.

Afrikaners who have studied the EU definition of what constitutes a "nation" tell me that they fulfill ALL THE EU CRITERIA for being a validly recognised nation.

I believe that Afrikaners have no hope in hell of getting a Homeland, no matter how "weak" it may be. No matter how few powers or how little true independence it may have. I just can't see the Blacks in South Africa, or even Africa as a whole allowing it - not now - not ever.

The extreme violence and force with which Blacks will kill this idea may not be apparent to people, because of the gentlemanly way in which Afrikaners have pursued, and continue to pursue this idea.

It is my belief that if Afrikaners ever got fed up and decided to act on their own, they would be on the receiving end of a violence the likes of which has never been seen before.

During my sojourn with the Black Zimbabweans some years back, at one point, Jay Jay Sibanda was questioned by the ANC Intelligence Dept, and was told in no uncertain terms: "We do not like White people getting involved in politics." These statements were made with reference to my activities in support of Blacks who were against Mugabe.

It is my view that the ANC will only tolerate Whites in politics up to a certain point. There are many areas in politics in South Africa where there is an unwritten rule to the effect: NO WHITES ALLOWED HERE!

Self rule... is one of those places.

What I am trying to emphasise is that although this whole self-rule idea has been pursued for a long time... (even under Apartheid believe it or not)... it is potentially a NUCLEAR BOMB in South African politics. I think one could liken it to the attempted cession of the South during the American Civil war. I believe, any attempt to establish a "White homeland" in any forceful way, will be met with an instant declaration of war by Blacks... and very possibly... with attempted genocide of Afrikaners (and Whites in general)... in an INSTANT.

So where to for the Afrikaner?

Here are my thoughts:-

1. I think it is wrong for Afrikaners to think in terms of a "Homeland". Even though a "Homeland" is less threatening, less "free" than an independent White country... Blacks will *NEVER* accept it. I think Afrikaners must instead pursue: An Independent White Country - which is not a part of

South Africa or in any way under ANC/Black jurisdiction. In other words: Fully blown cession. Either path will be equally difficult, so Afrikaners might as well go for Full-freedom instead of "half-freedom".

2. Show me any nation on earth (except a tiny handful of exceptions), which came into existence without bloodshed. I concede exceptions like Liberia, for example. But these are the exceptions. 99.9% of independent nations on Earth came into existence in one way only: Through bloodshed. Many nations only became established not through one war... but through SEVERAL WARS. Some had to fight on and on for their existence until their enemies finally accepted their existence.

To sum up: Though Afrikaners are very gentlemanly and cultured about the whole thing, I believe, they will never get so much as one grain of sand until the day when that sand is stained red with blood.

I do believe that Afrikaners are also in no hurry because they are watching the ANC ruling South Africa, and I am sure that consensus among them is that the ANC will weaken South Africa and consequently ITSELF... and in time to come, when the ANC is weaker, Afrikaners may be able to make their move. So Afrikaners may be wisely biding their time, waiting for the moment when they believe it is opportune to act.

So just because Afrikaners are not jumping up and down in frustration at the moment does not mean that one day, they won't be much more aggressive about the whole thing. And when that day comes... you will see an explosion in South African politics the likes of which has never been seen before.

Now it could be that the ANC itself fears such a day and that the ANC will work day and night to strengthen itself and to head off such an event.

But to return to the whole Afrikaner Homeland thing... and achieving it. I don't believe it is an easy thing to do at all. I believe that to achieve it will require tremendous willpower, tremendous determination... and above all... TREMENDOUS COURAGE and SACRIFICE. I don't believe this Afrikaner dream can come true without many people dying in the process.

And if the Afrikaners ever achieve it, I don't believe they will be left alone in peace for one minute either. I believe that like Israel... they will have to be ready to fight 24/7... in defence of whatever they achieve.

I am not being negative about the whole concept. Indeed, I am quite keen on the whole idea these days. I have become a full convert to this idea. I just want to make it clear to people that I don't think it can be attained in a peaceful manner at all. All of history is filled with examples of peoples trying to break away to form their own state.

I would like to mention the concept of Right Wing terror in this regard. The Far Right, who have dreamed of this idea, have accepted that attaining it won't be easy and that blood must flow or else it won't happen. Thus it was that the Far Right was prepared to engage in Right Wing terror.

I am not going into a military analysis of Right Wing terror and why I believe it is completely doomed to failure. I don't believe that Right Wing terror will in any way help the Afrikaner forward. Indeed, I believe it may well hinder the Afrikaner cause.

It is my view that if Afrikaners want to establish a state one day, that they will have to do it in a proper military manner. They would need to form a proper army which will engage in a series of battles to create this state. Such an action would of course result in an immediate race war and civil war of the bloodiest kind.

How does one create a fully blown army out of nothing if you don't have a state, or funds? Well, its nigh impossible. If it was easy, everyone would be doing it. But in reality, it is an extremely difficult task... and maybe even impossible to a certain degree. Yet... I believe the creation of a proper Afrikaner Army would be a prerequisite for any Afrikaner state to stand even the slightest chance of coming into being.

The only positive comment I can make is this: If Afrikaners want to establish an Independent State then it probably CANNOT be done without the support of at least two or more other countries in the world. Only Governments have the sort of power which can really aid people to create military forces.

The Blacks in Africa did not run their wars by themselves. Without the generous sponsorship of the Soviet Union, China and Warsaw Pact nations, the Blacks would have achieved NOTHING. The same applies to Afrikaners. Without support... most probably from Europe since their kith and kin originate from: Holland, Belgium, Germany and France - Afrikaners stand no chance. They can very possibly get some sort of support from Australia and New Zealand too one day.

This leads me to my final points about achieving an independant White Afrikaner State in Africa:-
1. All negotiation with the ANC will be completely futile and as a matter of principle should not be done - for many reasons.

2. As experience has proved, the Zulus (and possibly the Coloureds) might be supportive of the idea since the Zulus might want their own Homeland (and the Coloureds would probably jump at a chance to get away from ANC domination).

3. Apart from the Zulus and Coloureds, all further negotiation on the African continent will be completely futile and counter-productive. All other negotiation must therefore take place, most likely in Europe, but also with certain parties in the USA, Australia and probably New Zealand.

4. If Zulus, Afrikaners and Coloureds formed a united front on the matter, and engaged in such foreign negotiations as a group - they might make a lot more headway faster.

5. Expect all hell from the ANC if they find out any of this is going on!!! BUT... for any headway to be made, the ANC would have to be ignored as much as possible - to the bitter end.

In closing: Afrikaner (and White Political Freedom) cannot be attained with out a lot of sacrifice and courage. It will be a hideous road to walk... and it is not for the faint-hearted. Chances are, once it is attempted, relations between Whites and the Blacks will be beyond repair.

My view of course is that the long term result will be well-worth it... no matter how horrific the path to it may be. In my view, this would be the "final solution" to our problems of trying to co-exist with Blacks. We have tried it for 350 years, and I think its time to call it quits and move on. We should just go it alone... because in the end, we will be much better off. Without us, the Blacks will collapse anyway, and then they will be less of a threat to us.

For those who do not see the positive military/security benefits of such a solution... well they should ponder it. As I said in my book, living among Blacks, where we are outnumbered, and surrounded, is truly dangerous and opens us up to terrorism and murder. But once we are separated from them inside a country with defensible borders (preferably chosen according to terrain - e.g. Rivers and mountains)... defending ourselves will be a piece of cake and we will be MUCH SAFER than we would ever be living among the Blacks where we can be murdered off one by one. The benefits of having one's own territory with one's own defence force are innumerable.

The ANC is busy DISARMING US... and criminals are murdering us off. Historically tribes and nations have fought for their own territory mainly because that is the best way of achieving SAFETY. And let's be frank... we are extremely unsafe. We are living in a country which is 8 times as violent as the world average - and most of that violence is aimed at US. We should begin thinking in terms of DEFENDING OURSELVES.

Even if we were permanently at war with the ANC, we would probably lose less people than we do nowadays by living amidst them. Think about it.

Consider this: There are 4 million Israeli Jews... which is close to the number of Whites in South Africa. In a fully-blown war, like the 1967 6-day war, the Israelis lost a total of only a few hundred men. In the October 1973 war where they were caught off guard their total losses were less than 3,000 people. The Israelis are up against 100 million enemies... and yet they lost less people in FULLY BLOWN WARS... than are murdered in South Africa in 1 month. Think about it.

1,600 White farmers have been murdered in South Africa in the last 11 years. How many White farmers do you think would be murdered if they were safely behind borders protected by our own army? I'd bet 1/10th of that amount or less.

Here we all are... moaning about safety, cringing from masses of violent, armed criminals, yet, this is precisely the reasons other tribes and nations sought independence in the past. It is not only about Freedom and the God-given right to choose one's own future - it is also about PROTECTING OURSELVES. We have a God-given right to self defence too.

There are many benefits to having our own country, but I have never seen anyone sit down and spell out the plusses. In my view, the concept has just not been marketed in detail. If it were... there would probably be a lot more converts to the idea.

If the benefits of a White country were marketed by spelling out:- 1. The financial benefits of being free of a majority of Black Socialist Freeloaders who will tax, steal and drive us into poverty.

2. How many lives would be SAVED, if we were able to protect ourselves? How many women and children would be saved from savage rape, torture and death? How many of the lives of our own people would be saved from the needless savagery of violent Black criminals?

If thousands of us are going to be murdered annually ANYWAY... Why not take a chance on war? Why die needlessly when one could instead DIE FOR A CAUSE? Why let women and little children be murdered... when grown men could rather die on the battlefield trying to make it safer for them? I am convinced that the deaths resulting from trying to get away from ANC rule will be no worse than facing a slow, long, drawn-out genocide. Indeed, when the body count is finally added up in the end, I'm willing to bet we'll lose less lives that way anyway.

They want to disarm us and let the violent criminals kill us off one by one. Why let them have it that easy?

Oil price could double in next few years...:

03 April 2005

[Its like back to the 70's... But... the difference is that many people have been working on alternative fuels and technologies, not to mention the many oil fields which have been discovered in the interim. The Americans will then pump oil out of Alaska, and won't need the Middle East. There is lots of newly discovered oil in Africa... even off the coast of Namibia. Anyhow... even so... the Investment bankers see the price of oil doubling.

It looks as if the Middle East conflicts are going to add a really interesting twist into our lives. Jan]

S.Africa: Professor writes: What about an Afrikaner Province?:

03 April 2005

[Here is an article about an Afrikaner Province. I would like to thank Julie for translating this for me. This is written by an Afrikaans professor.

Of course the Professor totally disagrees with the types of sentiments which I wrote about in my own article. He talks of an Afrikaner Province within South Africa.

I have given my reasons as to why the ANC will *NEVER* allow this to happen and why I believe that ultimately, nothing will happen unless violence and force is used. Of course people will write me off as an extreme radical. I will merely say that I am being PRACTICAL and REALISTIC! I counter them by saying this: All the moderate paths, such as these most reasonable ones espoused by the good professor below WILL FAIL. In my view, reasonableness stands no hope whatsoever.

I once wrote about the Parable of the Unreasonable Man. I think it was George Bernard Shaw who wrote about the Unreasonable Man. He basically said that in this world, most people are reasonable. Because they are reasonable, they conform. And because they conform, they change nothing. Then along comes the Unreasonable Man. He does not conform. Instead, he FORCES his views on others. Therefore, concluded Shaw, ALL PROGRESS IS DEPENDANT UPON THE UNREASONABLE MAN.

I know that most Afrikaners are indeed very reasonable people. I therefore believe that because of their very reasonableness, they will fail to get their self-rule. I believe that in the end, the Afrikaner will only get what he wants when he learns to become unreasonable. (How the heck did the Blacks get their way? ... They did it by being extremely unreasonable!)

But here, for everyone to read is a voice, like many in Afrikanerdom, which is reasonable, intellectual and cultured... the very opposite of me!!! Jan]

S.Africa: Speculation about Black African Pope:

04 April 2005

On the TV news this evening there was talk of the possibility that the next Pope would be from the Third World, and possibly even from South Africa.

It appears almost certain that the next Pope will be from the Third World... most likely South America. But one never knows if some Black will wangle his way in there. That would be interesting to see.

Apparently the Roman Catholic Church is growing very rapidly in the Third World. In Zimbabwe, the Roman Catholic Church supported that Black Hitler - Robert Mugabe. Now they oppose him. The Church can be very stupid when it comes to supporting Marxists.

Japanese Sexless marriages and low birth rates:

Which is worse: Hell or Nigeria?:

05 April 2005

[Africa's richest and most populous black African country is a cess pool of crime. But we are going backwards ourselves. Today it was announced that 37,000 Govt employees were being investigated for stealing money which was being paid to the poor. This is nothing new in South Africa. I have long heard stories of how black Govt officials steal money from pensioners for example. Blacks will tell pensioners that there is no money for them - when in fact the Govt employees have pocketed the pensioner's money!! All that is surprising is the scale of it... and that the Police are checking on 37,000 employees. Yet, this does not surprise me.

This article was written by a black man in Nigeria - note how he compares Nigeria to hell. I have been saying for years that Africa is a Garden of Eden and Black people create their own hell here. They can blame White people or God if they wish, but the truth is they are the ones who squander the riches which God gave them (fantastic country, stacks of oil) and they create their own hell. Hungry Zimbabweans grow food where they can:

05 April 2005

[Sometimes Mugabe admits there is a food shortage and at other times the old liar pretends he has enough. Note how the MDC has not solved any of Zimbabwe's problems. That is because they refuse to see that armed conflict is the only way to rid the country of the evil man which most blacks voted for originally.

Black people create their own living hell all by themselves and then they are too weak and cowardly to solve a problem which they created. This is proof that they should never have been given this freedom to begin with and that Whites were right about them all along. Jan]

Fascinating: Racial IQs and other statistics:

11 April 2005

[I stumbled upon this very fascinating page. It appears to be a Finnish website which deals with Darwinism. They had these statistics on the site which are fascinating.

This proves what I, and others have been saying for years, that Orientals are the most intelligent people on the planet, with Whites a short way behind, and then Blacks lagging much further behind.

A particular point of note in the stuff below are the IQ scores of Blacks in Africa, versus Blacks outside Africa. Blacks outside Africa have higher IQ's than "purebred" Blacks. The "purebred" Blacks are have dreadfully low IQs. An IQ below 75 is the equivalent of a moron - a person who can barely help himself. Interestingly, Blacks in the "heart" of Africa are the ones who most often have this score.

It has been said to me by White Americans, that the reason Black Americans have higher IQs is because they have been partially interbred with Whites. This sounds much like our Coloureds in South Africa, who also have higher IQ's than Blacks. I've never seen studies showing this, but I am quite certain this must be so.

The numbers below definitely show the superiority of the Orientals over Whites - though the actual differences between Orientals and Whites are marginal.

A friend of mine, Jeff Nyquist, once said to me that giving Democracy to Blacks (the "purebred" kind) was a major mistake... because one is giving Democracy to nations of people who have the IQ level of morons... and it is inevitable that once left to themselves... they will create hell for themselves. And, as can be seen, after many decades of decolonisation, this has indeed happened. Jan

Israel: Sharon fears assassination and Civil War:

11 April 2005

[Israel is walking down the same road to surrender that Rhodesia and South Africa walked. Israel is being forced, like we were, against their wishes, to give in to their enemies. The Israelis are being forced to make peace with terrorists who hate them and who want to chase them into the sea. The Israelis are being forced by the American Govt, just as the Afrikaners and Rhodesians were forced by the same Americans to surrender.

And look where surrender took us Rhodesians? Nowhere! Most of us either left, or were run out of the country by the Marxist terrorist murderer who took control.

And look where surrender is taking the Whites of South Africa? Slowly, bit by bit, the Blacks are trying to break what little power we have left. Their intention, in the long term, is to get rid of us.

And where is the USA, who told us to surrender and who promised us that they would look out for our interests? Where is the US Govt now? Nowhere to be seen... presiding over Mugabe's Nth cheated election... doing nothing to the ANC, and nothing to Mugabe. The US Govt's promises and words are not worth as much as a toilet roll... yet we had to hand over our lives on the basis of EMPTY, WORTHLESS PROMISES. It will be no different for the Jews.

The Jews face an even more implacable enemy. Just as many Blacks dream of chasing the Whites, especially the Afrikaners into the sea, so have Arabs said they want to chase the Jews into the sea and kill them all.

In the last days of Rhodesia, and South Africa, there were rumblings and grumblings of Coups and Civil war... but it never happened. I hope, however, that the Jews do manage to pull off a rebellion. From what I hear, there is a lot of discontent in Israel, and calls for defying Govt action and for open rebellion. I hope the Jews manage to do this. Why? Because there are some things in this world, that men must stand their ground for, and fight and die for.

Rhodesia was right. South Africa was right. We stood for progress and the truth. The fact that the Blacks could not handle the truth, is not our fault. In the same way, Israel shines its light of development and progress on the Middle East. These little nations have been forced at gunpoint to accept a surrender by a misguided USA. I hope however, that the Jews manage to rebel. I would love to see a Right Wing Govt take control in Israel, and fight its enemies to the death, while ignoring the US State Dept - which is a tool of International Communism. The US State Dept has done nothing positive for the cause of the Western world, or the USA itself. The US State Dept is the most evil portion of the US Govt. This misguided, enemy-mole-infested department has done nothing but prop up Communists, Dictators and terrorists - all in the supposed name of peace.

I hope the Jews manage to pull off a rebellion of the kind which we, unfortunately, were not in a position to pull off. Jewish success would definitely give me hope that we can save ourselves in Africa. I would love to see a White state on the African continent, in the same way that there is a Jewish state in the Middle East. The nett results would, in my view, be positive in both cases - bringing sanity and progress to regions otherwise controlled by power-hungry incompetants. Jan]

USA to bail out bankrupt S.African Municipalities:

11 April 2005

[Isn't this ridiculous? The new Govt can't run its own cities, yet Whites from the other side of the world have to come and bail them out. Note the comment below: "Officials will (also) learn how to do their jobs well..."

- which bespeaks of incompetence and corruption.

What goes unsaid, is that the Whites in the past ran these same Municipalities much more efficiently, with a fraction of the funds and were never bankrupt. S.Africa: Here comes Communism through the back door...:

12 April 2005

[Here it finally is... the thing which freaked Whites out about 10 years ago or so. The ANC mentioned it would be taxing property. This is outright Communism. Communists always wage war on Property Owners. If you go back to the Bolshevik revolution, they were killing property owners then... and they are killing them in South Africa right now... when they murder farmers. But, deeper, lurks a hatred of those who own "the means of production"... and land owners. Here is one more cross to bear for our embattled farmers.

Furthermore, take note of the "reassurances" given by the Minister. They say: "It does make provision, however, for the minister of agriculture to jump in if the tax is so high it affects production of foodstuffs." Rest assured that this assurance is worth less than a sheet of toilet paper.

This article was actually marketed as "Property tax is mostly good news"... and as you will see in the opening lines, it mentions: "Gee, the farmers aren't too enthusiastic about that!" Of course not!! The Property Tax, which is outright Communism, is something most of us feared.

As I have been saying for years... One cannot co-exist with the ANC because the ANC is coming to get you... in one way or another. The bastards just won't leave us in peace. Bit by bit, they intend breaking us down.

There is no place on the African continent for people other than Blacks. The joke is that as the Blacks take firmer control, I believe you will

see: More black-on-black wars, more genocide and more poverty. The ANC is coming after us Whites because we are successful - BUT WE ARE NOT THE PROBLEM AND WE NEVER WERE. WE WERE THE ONLY PEOPLE WHO ACTUALLY MADE THIS CONTINENT FUNCTION... and chances are... WE ARE THE ONLY PEOPLE WHO CAN STILL SAVE IT - as ironic as that may seem. Jan]

Bizarre Weather: Monster Storm hits Cape Town:

12 April 2005

[The weather of the last 4 months has been the strangest I have ever seen. I've lived in Johannesburg for 20 years now, and this summer was the wettest I have ever seen. I haven't watered my lawn since about November or December - which is really amazing, because normally, even during the summer, I have to put on my irrigation regularly.

The weather is too bizarre... and I note how often the meteorologists get it wrong - almost daily.

I think there is some strange weather all over the world in 2005, but we've had our fair share too. The Cape was in the midst of a DROUGHT, and then they were literally drowned!! Jan]

S.Africa: Affirmative Action does not work with Pilots!!:

12 April 2005

[This is funny. Affirmative Action does not work so well WHEN SKILL AND COMPETANCE IS A MATTER OF LIFE AND DEATH!!! At least two black pilots have died in the last 2-3 weeks in flying accidents. The other incident, not mentioned here, is when a Police helicopter on a training flight fell out of the sky on to someone's house. Both occupants of the helicopter were killed.

Note below, how the White instructors are accused of being "racist", when in fact, they are complaining about the competency of the pilots. Apparently there are lots of black pilots currently being trained, and a large number of them are women.

Maybe... some of us should consider not flying SAA (South African Airways) in the future when all these new pilots come on line? As I mentioned in a previous article, Africa, with only 3% of the world's planes accounts for between 10-50% of the world's total fatalities. Jan]

Will Zim really compensate white farmers?:

12 April 2005

[I think this is being done mainly for propoganda purposes. Many of the farmers have rejected the offer anyway saying it is a paltry sum compared to what they lost. I think Mugabe is trying to rehabilitate himself politically and now he is making these "conciliatory" gestures.

When Mugabe recently gate-crashed the Pope's funeral, he happened to shake hands with Prince Charles. I am disgusted with Prince Charles for shaking the Black Marxist fiend's hands... but anyway... Mugabe then actually invited Prince Charles to Zimbabwe!! No doubt... in order to BEG FOR MORE MONEY FROM BRITAIN!!! Jan]

12 April 2005

[I think that the total prison population of South Africa is equal to, or slightly exceeds that of the USA... which would mean that per capita, we have 7 times as many criminals per capita as the USA!! Prisons are now too full... the justice system is buckling under the strain of those caught... NOW REMEMBER THAT MOST CRIMINALS ARE NOT CAUGHT... THE PRISONS ARE ALREADY OVERLOADED JUST FROM THE FEW THAT ARE CAUGHT AND WHO DO NOT ESCAPE ON LEGAL TECHNICALITIES.

I wonder what the real crime rate of South Africa would be if our justice system functioned properly? Would we be sitting with a prison population of say, 500,000 or 1 million or more? Surely then we would be the most "criminal" country in the world? I'm sure we are...

As you can see in the incarceration statistics below, as things stand we already have a prison population almost 3 times higher than the world average!!! Jan]

These types of Coup plots are a waste of time. All that Whites can realistically do is spread the news, prepare themselves psychologically and wait until one day when the Blacks make a move - which they will. The Blacks have a self-destructive approach to life and it is only a matter of time before their leaders have no choice but to turn on us and blame us for their failures. Jan]

S.African Communist Party wants Land Reform speeded up:

15 April 2005

[I have been saying for years that the S.African Communist Party is behind all this so-called "Land Reform" and that this is just another carry-over of Marxism and Bolshevism in the form of attacks on White Farmers. Look here, now the Communists are coming out into the open saying what they want. These are the bastards who are behind the destruction of our Agricultural Sector and who want to wipe out our White Farmers. Bastards. I've always said the only good communist is a dead one.

President Mbeki addressed the S.African Communist Party recently. I really must put up some photos of this event.

Note, with typical communist deception their slogan: "Mawubuye Umhlaba: Land, Food and Jobs!" Land, Food and Jobs... the same theme Mugabe espoused. NONE OF IT IS TRUE... They'll take the land and then there will be LESS FOOD and LESS JOBS. Communists always move forward with the LIE that this will BENEFIT someone... It never does... It only benefits them. The Blacks and everyone else will be worse off afterwards. Communism is about power, about theft, about stealing from others and DESTROYING OTHERS. It brings nothing positive with it... only DESTRUCTION of things which already exist. Jan]

Did the ANC bank roll Mugabe's cheated election?:

15 April 2005

This is an interesting question. On E-TV news at 7pm, on 14th April, 2005, I heard them mention that the Freedom Front Plus has said that the ANC bankrolled Mugabe's cheated election.

This interests me, and I am looking for more info on this.

Of course it does not surprise me.

In parliament, Mbeki took some heated questions from Tony Leon on the issue. Mbeki suddenly pretended that he would decide his views on the Zim election after the various court cases, etc... yet, this is the same, deceptive, lying Mbeki who stated categorically before the election that the Zimbabwean elections would be free and fair. Now he is dancing around, changing his tune depending on who attacks him.

Yet, the lesson should be clear to all Whites, for whom the Zimbabwe issue is a burning one - that Mbeki and the ANC are PATHOLOGICAL LIARS when they face us. These lying scum firmly support that piece of garbage

- Mugabe - and they want to DECEIVE US and fool us. Mbeki's words and the words of the ANC in general have less value than one sheet of toilet paper. I firmly believe that one should *NEVER* believe their public pronouncements because they are liars. But it is good that White people raise the issue, and that the answers are recorded because at least then it is all there for the historical record... which is a very important thing.

US Intelligence wrong again... on Iran:

15 April 2005

The US Government has told the Israelis that in their view, Iran won't have nuclear weapons for a DECADE. The Israelis say... the point of no return (after which attacks will leave nuclear debris around)... is a mere few months away.

The attitude of the US Government never ceases to amaze me. Time and again, they get it wrong... ESPECIALLY IN THE MIDDLE EAST... I don't think the MOSSAD has ever been wrong on any of its major predictions over the years. Yet here is Bush arguing with Sharon telling him there is no problem... when Sharon brought photos, etc.

The Israelis, through their contacts have infiltrated Iran. They know all they need to know about the nuclear sites, etc. They're not guessing... they have had people there...

The US Govt has a long history of making decisions based on bad intelligence - not only in the Middle East, but Africa too. The USA helped keep Gaddafi in power... Castro... and so on. It was the MOSSAD who told the US Govt that Saddam would invade Kuwait. The CIA did not believe it. The MOSSAD was proven right.

But... here we go again... bad US Intelligence... leading to bad US political decisions... OR... is there good US Intelligence, but weak and spineless political/military will? What is the real game? OR is the US Government scared of Russia?

Once thriving Zimbabwe in ruins... more of God's revenge...:

15 April 2005

[How true... Rhodesians used to say: "Come to Rhodesia and see the Zimbabwe ruins"... then in later years they joked: "Come to Zimbabwe and see the Rhodesian ruins"... Now I suppose we can say something along the lines of: "Come to Zimbabwe and see the ruins EVERYWHERE..." because there is nothing left of that fine country. It took a Marxist piece of garbage like Mugabe only 25 years to destroy a fantastic country which White men hewed from rough bush and built up for 90 years.

But the good news is that the self-destructive tendencies of the Blacks will boomerang on them. All manner of evil comes to them because of their disrespect for Whites and for the environment around them. This Marburg outbreak in Angola is too funny. Blacks are dying... Do you know why? I'll tell you: The Blacks have destroyed everything... and they can't farm in Angola either. In Angola, those Blacks once cut the breasts off living White women and they took Portuguese people and sawed them in half in saw mills. But God's revenge is at hand... The Black people of Angola have not had a day's worth of peace and prosperity since the 1960's until now. And why are they dying now? Because they can't farm and feed themselves so they're killing the monkeys... and the monkeys carry a disease with them... The disease is dreadful... it makes your bleed to death through ALL your orifices. And so... God's creatures... have their revenge... and the Blacks are dying...

If the lazy Blacks had farmed, they would have not been dying from this disease. Such are the fruits of ignorance and laziness.

This is good. This is God's vengeance for the horror and hell which the insane, greedy, lazy Black people have brought upon Africa. The Blacks are destroying the finest Garden of Eden which God put upon this planet... but maybe God will destroy those who cannot exist in a land of milk and honey. Maybe God will annihilate those who whine and complain even as they live amongst

incredible riches and wealth. Maybe God will destroy those who do not respect his works, nor his creatures. Maybe... God will remove the Black Africans from the face of the Earth because they do not deserve to live here.

Maybe they are not fit to live. They cannot live with White people. They cannot live with each other. They cannot live in harmony with God's creatures. Everyone on the planet helps them, but still they are ungrateful and blame everything else for the problems which they created. How long will God tolerate such ingrates?

But wait... its not finished... not yet... not by a long shot... In Zimbabwe... the weak, spineless Black people, who want freedom but are too cowardly to stand up to evil from in their own ranks... all living hell awaits them... their day has yet to come... This is only the beginning...

We Whites... we can leave and we can prosper in other countries... We can watch the Blacks die by their own hands... and when the Blacks have wiped themselves out one day... maybe our great grand children can come here and wipe the few remaining ones out, and take back these countries. Maybe... Maybe that is God's secret plan?

Maybe... as the Black African leaders are plotting to ensure that all Whites are destroyed or run out of the continent... maybe God is quietly planning THEIR DOWNFALL!! Jan]

Brilliant! Scientists accept Computer generated gibberish paper:

15 April 2005

[This is brilliant... genius actually... Many years ago, a friend of mine was on a course where she was given a table of words which if you put them together randomly, they sounded like they made sense. To this day, I wish I had photocopied some of those pages from her course... and I still wish I could find such a thing.

Part of the course mocked "blinding people with science" (sort of) and it showed that if you threw a bunch of fancy words into text or a talk... people would think you are saying something deep and intellectual when in fact you're just talking cr*p....

These guys must have written a whole program to generate this... and I think its brilliant... I wish I had one.

Once... in the early 1990's.... when I contracted at a mining house, I once wrote something along these lines for a boss of mine... My boss actually thought I was being serious when in fact I was pulling her leg...

I am quite certain that a lot of complete *JUNK* masquerades as intellectual works... Of that, there is no doubt in my mind.... Hence I also question many things that are regarded as: HALLOWED in the world of science... Some of these academics are... actually morons... I'm sure there are certain subjects too where being a complete numbskull will not stand in the way of your progress and promotion. You can be a total idiot and nobody will notice... as long as you make the right sort of monkey noises... to go along with it. I would guess that subjects like: Philosophy, Psychology or Political Science are open to such "fraud".

For the others, here is the brilliant piece - this is genius really... these guys should get a Nobel Prize or two, plus an Oscar thrown in for good measure for this. They have real talent!!!! Jan]

Bizarre Weather: Thousands Flee Comoros Volcanic Eruption:

18 April 2005

[For several months I have been writing about the bizarre weather, as well as the strange tremors - from Antarctica up to the equator. Recently, 4 volcanoes have become active - 3 in Indonesia and one in Japan. But now a 5th volcano has become active.

I did mention when the tsunami occurred that massive earthquakes can cause other earthquakes up to a year or more later. Since these volcanoes are becoming active around Indonesia - and the volcanoes have since also kicked into action... I can't help wondering if it is all linked? It surely must be. Perhaps the movements/stresses causing/triggered by the quakes are now also causing the volcanoes to erupt? A volcano is a "surface phenomenon" - meaning it is not very deep. Volcanoes can be powered by rock which is melted by the stresses just inside the earth's crust. I find it too coincidental that the volcanoes are suddenly becoming active so shortly after the earthquakes.

It appears to me something very interesting is happening in the Pacific ocean... and perhaps it is far from over. The latest victim of this series of events is the small Comoros islands off the east coast of Africa which are not far from Indonesia. Something is brewing... Jan]

Mugabe's grip is tighter than ever:

18 April 2005

[For almost a year I have been saying that Mugabe is going to flatten his opposition. It is happening... and this election hurt the MDC a lot. I firmly believe that the only way forward is: WAR WAR WAR... BLOOD BLOOD BLOOD. Nothing else. All other options are just pie-in-the-sky and big damned waste of time. All that Mugabe understands is force. All that will remove him and his decrepit Marxists from power is the full force of warfare. Strikes, protests and even Mass Action as the MDC has tried - will achieve *NOTHING*. NOTHING. The only way to ever fix up that country is with an invading army and nothing less. Note too... how at least one Black guy is found "equally guilty" of murder. Is God working Miracles on the Earth in 2005?:

19 April 2005

[For quite some time I have been writing about a belief - held in my family at least - though I am not sure how widespread this belief is among African Whites - that AIDS is possibly a plague sent by God against Blacks, etc. It is an interesting thought.

Yet, a similar thinking is now "erupting" (pardon the pun!) among Israeli Jews (on quite a large scale I am told), that God is now intervening against the Muslims. The Jews are looking at the Tsunami (just after Xmas 2004) and the aftermath, and are wondering if "God is fighting for them"... as he promised he would. (See the Old Testament for statements where God promises the Jews that he will fight on their behalf as long as they BELIEVE!)

Since December... there have been several earthquakes, and in recent weeks a total of 5 volcanoes have suddenly come to life. This could be evidence for vast tectonic movements taking place in the Pacific. Such movements underground could easily be creating pressures which not only cause quakes but which are waking up previously extinct volcanoes.

All the Jews I have spoken to whether Liberal or Right Wing, have told me that they are expecting MIRACLES - MANY MANY MANY MIRACLES - on an incredible scale - to take place at the time of the coming of the Messiah. The Jews have told me that according to their scriptures they are expecting God to do incredible and unmistakable things to demonstrate his power and to SAVE ISRAEL FROM DESTRUCTION.

Of course, this has great implications for those Conservatives and Christians among us. Is God going to create a situation whereby Conservatives are saved off from defeat by the Left, by Communists, by Terrorists? Will God make the world so unstable, and sow so much destruction against our enemies that suddenly there will be VICTORY where previously we stared DEFEAT squarely in the face?

The Jews are fascinated by what they believe are God's actions against the Muslims... And here in Africa... I look on the swathe of destruction which is cut through the Blacks by AIDS... and I am amazed. Look at African nations who fail, and fail, and fail... and how bad luck keeps visiting them? Look at Mugabe, the man who hates Whites with a passion... yet the hatred is hardly out of his mouth, than his stupid nation suffers more reverses. It is as if not a day of luck comes to them.

I have written in the past about amazing Angola and how the Blacks there have not had a day of peace in more than 40 years. Yet, most of Africa is much the same. Decades of freedom has brought them untold misery and failure. Now AIDS is RAMPANT across Africa slaughtering people like never before. I have noticed in the comments of many Whites in Africa that they see AIDS as a sign of HOPE! I have never heard Whites (except myself and some in my family), openly talking about AIDS as a MIRACLE FROM GOD... intended to annihilate our enemies. AIDS is destroying Africa's already fragile economies.

In the article below we see a "fairly non-religious" Jewish woman suddenly talking in depth about why she sees the Tsunami of 26th December 2004 as an Act of God in support of the Jews. What makes the Tsunami so fascinating is how it happened after Christmas, and how many Christians were saved... while at the same time raining down hell upon the Muslims - the sworn enemies of Israel and the Jews. It is as if God smiled on the Jews and Christians while slaughtering the Muslims. And it is far from over.

I have heard it said that the destruction the Muslims suffered in Indonesia might be DOUBLE what is officially claimed. Hundreds of thousands may be dead. But now volcanoes are awakening in the biggest Muslim state...

I want to report on a discussion with Dave, a Liberal South African Jewish friend of mine. Dave said to me he had a discussion with his Rabbi about the end times and what the Rabbis are

expecting. His Rabbi said that his studies had led him to believe that the coming of the Messiah will be preceded by MANY MIRACLES... AWESOME MIRACLES... MIRACLES THE LIKES OF WHICH WE HAVE NEVER KNOWN!! Many regard the Tsunami, quakes, volcanoes and AIDS as DISASTERS... But maybe we're seeing them in the wrong context? Maybe these are really MIRACLES... coming from God, in support of his few faithful sheep who are being wiped out?

Another Jewish friend of mine in Israel, who has a deep knowledge of the scriptures tells me that there are secret Jewish writings going back centuries which are known to only a few, and in these writings are predictions foretelling of awesome events in our time... and that that time is now upon us. My Jewish friend tells me that we can expect to see entire nations being wiped out - from the face of the Earth - by God.

My Mother always reminds me that it is written in the Bible that God says he created the Sun, Moon and the weather and he can do with it what he wants to.

My Jewish friends also tell me that the Messiah they are expecting is NOT going to be a "love-all" kind of guy. The Messiah they are expecting will be a leader and a warrior.

I have written, in recent years, that I believe a World War, an Armageddon, might actually be a GOOD WAR ... where the Good people win over the more numerous evil ones. It could be a triumph of the FEW against the MANY. In talking to my Israeli friends, this concept is in their minds too.

In the Bible (Old Testament), God tells the Jews that he will save them, and that he will FIGHT FOR THEM, but they must believe in him.

The Jews are not expecting peace on Earth... the Jews are expecting WAR, and the Jews are expecting TOTAL VICTORY OVER THEIR ENEMIES... THANKS TO THE HAND OF GOD.

So far, 2005 has seen the MOST BIZARRE WEATHER ALL ACROSS THE PLANET THAT I HAVE EVER SEEN.

So I want to raise these questions:-
o Is this the work of God?
o Does God want Jews to survive in Israel?
o Does God want White people to REMAIN IN AFRICA?

These will be fascinating things to ponder as we see what further strangeness awaits the world in 2005... which truly is proving to be a very very strange year! Now read this amazing article by a non-religious Jewish woman. Apparently, this kind of thinking is now common in Israel. Jan]

Mugabe puts Army on alert in preparation for Mass Protests:

19 April 2005

[Mugabe said he took power by the barrel of a gun and that he intended keeping it that way. He is true to his word on that. The MDC think they can scream and shout and demonstrate and that will bring Mugabe down. WRONG!!! Do you want to know how Mugabe and ZANU(PF) will fall? Answer: When an ARMY invades Zimbabwe and shoots the Zimbabwe army to bits and crushes ZANU(PF) and Mugabe through violence. That's how. All other tricks will prove to be a complete waste of time. The Pope Africa won't like...:

20 April 2005

[Although Mbeki made positive sounding noises about the new Pope, South African radio and TV bulletins have been very negative. He is described here as the "Panzer Pope" - and as being very conservative, etc. Personally, I love anything that irritates the left... Of course, one must be careful... President De Klerk was originally described to us as a "hard core" "right winger", when in fact he was the complete opposite. But if this German Pope is the hard-case he is cracked up to be (who even said communion should be refused to John Kerry), then I am very hopeful. He seems to be a Germanic "organiser", and appears to want efficiency... and that will be interesting... I don't know if Black Africans will like that.

Bishop Desmond Tutu, who I believe is really an Anglican, was saying he wanted a Black Nigerian Pope... was disappointed by the results.

So here's hoping that some Conservatism won ground in the Roman Catholic Church. If so... then the Left will be very unhappy... and that, frankly, makes my day!! Jan]

Internet is killing Network News:

20 April 2005

[This is good news. The Commies and the Left had a monopoly on TV, plus it was one way... it was propaganda and you had no way of countering it. Now, with interactive, internet news, it will be much more difficult to brainwash people. It is possible that the Communists and Left were too slow in brainwashing the world, and that technology might now have created a means of pulling the rug from under their feet. It is possible that a World Wide Right Wing movement will start on the Internet and be unstoppable... and it might completely undo all that the Political Left achieved through lies. The Commies might have been too slow... and their grip on the minds of people through their slanted pro-Left propaganda will now be lost... Bye Bye to the Left... Your days are numbered you lying bastards!! Jan]

US Intelligence: Arab Terrorists have Nuclear Bomb for attacking USA:

20 April 2005

[This is the same group of terrorists who cut off people's heads. Where did they get the nuclear weapons? And I wonder how much the Russian scum helped them. Jan]

Pope Benedict XVI: Enemy of Jihad:

20 April 2005

[Now this is good news. Note how the article states that this shows that the Roman Catholics have cast a vote for the survival of Europe and the West. Excellent stuff.

Roman Catholics have traditionally been heavily infiltrated by outright Communists and the left in Africa. If this opens up the possibility of the Roman Catholic Church starting a move to the RIGHT... then... Glory Hallelujah... Let me not get too hopeful... but this is an interesting sign... and worth watching.

The Israeli Jews reckon that their war against the Muslims also must include a Christian/Islamic war. It appears to me, that Christians and Jews really have no choice but unite against Islam, which like the Blacks, has sold its soul to the Devil (Russia and China) in pursuance of Terrorism. Islam has possibly forfeited its position as a religion by doing this. Jan]

Zimbabwe Capital's new Health Time Bomb: Overcrowding!:

20 April 2005

[Take careful note, all you naysayers... of the remarks below pertaining to "ablution facilities installed during the COLONIAL ERA!"... take note... that in 25 years... the "new Black Govt", "doing things for the good of the Blacks"... was unable to set up new toilet facilities, etc! They were probably too busy stealing all the public money. Take note... that during Colonial Times... WHITE PEOPLE... PLANNED CITIES and THOUGHT OF THE FUTURE... a habit which Blacks all too often do not care about. Just as Johannesburg's infrastructure is in danger... after years of ANC wastage, mismanagement, etc... so too do we see what is happening in Harare.

Let me tell a Colonial story:

Look at how you now get 15 Blacks now living in a house built only for 6. I remember my parents often telling the Blacks: "If you want a higher standard of living you must have less children - like we do - then you can afford to give them a better education, etc." Of course the Blacks never listened to any good, well-meaning advice Whites gave them, because that is the spiteful nature of Black African people. They don't even listen to the advice of White people even when it is obvious that Whites practice what they preach.

Blacks always run around saying we were trying to "kill them" by telling them to have less children. But we had less children - so what the hell is their problem? Is it a sin saying to them: Try and have less than 6 or more children? Its common sense... and there is no evil in it... just good commonsense and sound advice.

But no... Blacks want to breed like rabbits... Show me any affluent society in the world where people breed like rabbits and have a high standard of living! It does not exist.

So... Blacks breed uncontrollably... and then they wonder why nobody has any houses; why they run out of land in their huge countries; why so many people are poor and why they can't educate their 6 or more children.

But... in steps God... and God's Physical Laws... and overcrowding leads to disease and more poverty... and more poverty spawns more hideous crimes.

Blacks flaunt God's physical Laws (which the rest of us abide by) and then they suffer the consequences and they run off screaming like babies saying that Africa... Garden of Eden that it is... Is a cruel harsh place. I'd like to see the spoiled brat Blacks trying to make a living in the desert... like the Jews do. The Jews can take hell and turn it into heaven - why? Because they are logical, disciplined and they work hard. But the Blacks, God's spoiled brat children, get the Garden of Eden and they screw it up and then they run around blaming Whites, Colonialism, Apartheid and GOD for giving them a bum rap. Jerks. Maybe they must watch their foul mouths and bad-mouthing the many blessings God showered upon them... maybe God won't put up with their spoiled-brat ways for too long! Jan]

S.Africa: Armed Guards robbed in cash heist!:

The Pope Africa won't like...:

21 April 2005

[Although Mbeki made positive sounding noises about the new Pope, South African radio and TV bulletins have been very negative. He is described here as the "Panzer Pope" - and as being very conservative, etc. Personally, I love anything that irritates the left... Of course, one must be careful... President De Klerk was originally described to us as a "hard core" "right winger", when in fact he was the complete opposite. But if this German Pope is the hard-case he is cracked up to be (who even said communion should be refused to John Kerry), then I am very hopeful. He seems to be a Germanic "organiser", and appears to want efficiency... and that will be interesting... I don't know if Black Africans will like that.

Bishop Desmond Tutu, who I believe is really an Anglican, was saying he wanted a Black Nigerian Pope... was disappointed by the results.

So here's hoping that some Conservatism won ground in the Roman Catholic Church. If so... then the Left will be very unhappy... and that, frankly, makes my day!! Jan]

Shocker: Racial Profiles are back in S.African Schools:

21 April 2005

[I love it when the ANC's propaganda, exaggerations and twisted truth finally bites them in the bum. They had a lovely habit of running around the world and twisting everything Whites did out of context and then pointing their grubby little fingers at the Whites and calling them "discriminatory" or "racist". Meanwhile... the Whites were merely doing logical things and trying to move this diverse and difficult country forward. The ANC now says it needs this information for "planning". Yes, you assholes, what do you think Whites needed the same information for? And FOR THE RECORD, the Whites did a hell of a lot of a better job of planning than you ever did. Jan]

Shocker: S.Africa has 8th highest teen suicide rate in world:

21 April 2005

[Why are young Black children killing themselves if the future is so bright that one has to wear shades? ... Well, it is most probably because they have no future and they know it. Employment opportunities for a child in this country are slim with our stagnant economy that is going nowhere because it is being taxed to death.

It is interesting to note in this article that suicides among Blacks during Colonialism was lower! Maybe Colonialism and White Afrikaner rule wasn't as bad or nearly half as depressive as the modern Leftist Liars like to pretend... while they are busy rewriting history to put a new spin on it! Jan]

S.Africa: Strange story of 3 cops on murder charge:

21 April 2005

[So who really is to blame? The crowd or the Police? I think the ANC should take the blame for all of it. They are the ones who made bold promises they could not keep to the Blacks. They are the ones who taught the Blacks to throw stones and to set everything on fire at the slightest hint of unhappiness. The Police were just trying to keep some semblance of order in a country where criminals run free and rule the roost. You don't see the rioters in jail. You don't see ANC officials in jail. But the Police are going to end up there - and they were just trying to do their job. Jan]

Zambia: 46 dead in explosion at Communist Chinese Explosives factory:

[Funny] S.Africa: Politicians survive helicopter crash:

21 April 2005

[Lucky for them, unlucky for us! They praise the "professional" pilot... but I can't help wondering, if he was so professional, why he hit the power lines to begin with?

I also can't help wondering if this is another one of our Affirmative Action Pilots? Come to think of it... this could make me a convert to Affirmative Action! What we really need in this country are *LOTS* of Black Pilots... the sooner... the better... Jan]

S.Africa: Indian man shoots family and commits suicide:

21 April 2005

[Interestingly, I don't see any stories these days about Afrikaner men wiping out their families and then committing suicide. Those stories used to be quite common. Maybe it is still happening but nobody bothers to report it?

I find it quite amazing to see news headlines these days where one sees Black men wiping out their families and then shooting themselves... and now here is an Indian man who also did it.

I find it quite bizarre that non-Whites are now killing themselves, and Whites don't seem to be. Maybe the Afrikaners are watching the ANC running the country into the ground and are quietly chuckling to themselves saying: "It won't be long now..." Maybe the miracle of AIDS has perked up a lot of White people. We can sit back and twiddle our thumbs while God fights for us... and prepares the way for us. Jan]

S.Africa: 17yo Pupil gives birth at school - her 2nd child!!:

21 April 2005

[I suspect this is a Black girl. As I was saying... if Blacks just breed like rabbits, then there is not much hope for them. Blacks have a way of NEEDING far more than they can PRODUCE. Blacks have a way of living that always causes them to consume more than they can produce. When it comes to having children, poverty does not put them off at all. They just have more kids... while not knowing how to feed them. It appears to me that Blacks are self-destructive. They ignore all the rules of logic and discipline and then wonder why their lives are so hard. Jan]

S.Africa: Communism: Going after the Rich White Managers:

21 April 2005

[Note the Leftist propaganda slant here. They say our high salaries are "not as bad as the United States". My reaction is to want to kick the writer of that ridiculous statement squarely in the teeth. I suppose the writer wants us to aspire to the opposite of the "bad" United States? What then would that be? Russia maybe? Where people work for a pittance and where White people have a lower standard of living than Blacks in South Africa? Is this what they want?

I think, it is a mark of EXCELLENCE, and a big feather in the cap of Americans that they do pay people enormous salaries. It is probably one of the things I admire the MOST about the United States - that EXCELLENCE can be rewarded in such a way. There are EMPLOYEES - yes, EMPLOYEES - in the United States, who earns millions of dollars per annum. They are paid such sums of money for excellent work and for being an incredible asset to the companies they work for. I think this is a most admirable thing. I think it would be a proud day if we rewarded excellence in South African business in the same way instead of using these rigid Communist-Marxist-inspired rules.

The Marxists in our Government whine about the good pay of our business managers... but have you seen how our Marxist Government officials waste tax payer money and abuse the money they steal from us?

At least our business people are doing something positive for the economy and the country, and they probably work 365 days a year anyway, whereas our PARASITIC, spend-thrift, wasteful Marxist Government officials probably never contributed anything positive and developmental to this country in their entire rotten lives!

Bow down you Marxist jerks, and pay homage to the business people of this country who manage to keep businesses alive despite your insane laws and your Communist-level Tax structures. Jan]

Excellent! Zim Opposition cuts ties with S.African Govt:

22 April 2005

[In the days when I still dealt with Black Zimbabweans, I made a point, on every occasion of telling the MDC members among them, and even the two or three senior MDC members I met, that the ANC was firmly on Mugabe's side. Of course, I am sure the Blacks never believed a word I said. My advice to them ALWAYS was: The only hope for you is revolution and war. Nothing else. You *CANNOT* beat Mugabe in any other way. All other channels will lead to failure.

I am pleased to see that eventually, the MDC realises that the ANC is really THE ENEMY! But do they realise how deep this runs? I doubt it. As even this article mentions, the MDC is going to try to get the SADC to back them - but in reality, S.Africa's views will win the day. The SADC is toeing the ANC line.

I told the Blacks that there was no hope for them, except to go to the West, to America or some other Western nation and to seek weapons for a war against Mugabe. Again, I doubt the Blacks had either the stomach for it, or they thought I was over-stating things. I'm sure they never really believed me.

Nevertheless, I am pleased to see the accuracy of my statements borne out as the years have passed. I believe, that if the MDC does not push HARD and really start a revolution, that the Blacks in Zimbabwe will abandon them. I believe Mugabe knows this and is angling to put them in a situation where he will crush them either way. If they move into an armed struggle, he wants to take them out, but if they opt for weaker measures he knows they will lose credibility among the Blacks and then they will lose their support base. I believe the MDC's support base is already crumbling. They waited too long. If they do not have the gumption to seize the bull by the horns then they will lose. I firmly believe that in the affairs of man, that there are times when windows of opportunity open for a period of time and if men do not have the conviction to seize upon the moment, then the opportunity will close FOREVER. It could be that the window of opportunity for the MDC is already closing.

I noticed among the Black Zimbabweans I met, a great love of talk. Everyone was a chief, and everyone loved meetings. There were too many Chiefs and Managers and nobody wanted to be an "Indian". They were great talkers. I looked at that and reckoned to myself that they would talk and talk and one day they would find everything was LOST - FOREVER. Mugabe on the other hand, is a man of action. He doesn't stuff around. Mugabe will take them down. The MDC is no match for Mugabe. Mugabe is cunning, clever and deceptive. Mugabe will crush them out of existence. The MDC's BIGGEST FAILURE is their DAWDLING and FIDDLING while valuable opportunities are lost. This may be the MDC's last chance to do anything, and if they fail, their support base will probably just pack up and call it a day.

My view, now as before, is this: The MDC must go to the USA and ask Bush to arm them. That's their only hope. They have majority support and the USA knows it and respects that. If they are too weak-willed for this, then they should just pack up their bags and call it a day and flee to England or somewhere else where the rest of the Black Cowards from Africa go. Jan]

S.Africa: Too few Female managers:

22 April 2005

[More Leftist claptrap. If God really wanted us to be equal, then why aren't we hermaphrodites? Why did he create male and female of most creatures? Let me give you the simple answer that has been eluding the idiots on the left for a century or more: SPECIALISATION! Yes... God obviously knew that SPECIALISATION is better - and hence he designed females to bear babies and he designed males as providers. Specialisation is logical. Specialisation also makes a TEAM more EFFECTIVE. God, obviously believed in EFFICIENCY and in creating a TEAM of Male+Female. These dopes want to interfere with a process that is the result of excellent design. They think with their stupid "logic" that they're going to make things better. The reality is that ever since the Left meddled with the Male/Female relationship they totally screwed it up, destroyed families and ruined the lives of untold millions of people around the world. The damage they did to the Male/Female relationship is probably the biggest disaster in the long list of disasters which the Left has created on this planet.

In South Africa, the added twist is that they use any excuse to get rid of White Males. Jan]

Super Scientist and Psychic: Mbeki: I was right about AIDS:

22 April 2005

[Let me get this straight: Mbeki is saying that if you eat right, then you won't be susceptible to AIDS. But that totally ignores the medical fact that AIDS is sexually transmitted. Sure, healthy people might have a lower chance of getting it... but that applies to any disease. However, I'm sure a lot of healthy people have caught STDs. Being healthy never prevented people from catching an STD... and the same must be true of AIDS.

Of course... once you are HIV+ you are going to DIE! Mbeki's "logic" won't save the 8-9 million Black South Africans who are HIV+. Jan]
